

IVRI designed Pashu Prajanan (Animal Reproduction) Android App

ICAR-IVRI has designed and developed “IVRI-Pashu Prajanan (Animal Reproduction) App” in collaboration with IASRI, New Delhi. This is an educational mobile app for graduating veterinarians, field veterinary officers and livestock entrepreneurs, providing information about major reproductive diseases/ disorders in cattle and buffaloes and measures to treat and control them. The app additionally provides the basic information on Artificial Insemination. The app is now placed on Google Play store and can be downloaded from the Google Play Store.
