

**ICAR-IVRI, Mukteswar organized method demonstration on “Use of poultry feeder and drinker in backyard poultry rearing” at Sunkhari Kala, Sitarganj, District U.S. Nagar**

**Mukteswar, 13<sup>th</sup> February 2019:** ICAR- Indian Veterinary Research Institute, Mukteswar campus conducted a method demonstration programme at village Sunkhari Kala, Sitarganj, district U.S. Nagar, Uttarakhand on 13.02.2019 under TSP. The theme of the method demonstration was “*Use of poultry feeder and drinker in backyard poultry rearing*”. A total of 41 tribal farmers participated in this programme. Dr C. Jana, Sr. Scientist and TSP Co-ordinator briefed about the utility and importance of various poultry farm equipments like poultry feeder and chick drinker for poultry rearing under backyard practice. In this programme, the team demonstrated the use of chick drinker and poultry feeder for better hygiene of poultry as well as effective use of water and feed. Various queries of participants on production and health aspects of poultry were addressed during the interaction. Poultry feeders and drinkers were distributed among the tribal farmers of this village for effective management under backyard practice.
