ICAR-INDIAN VETERINARY RESEARCH INSTITUTE
(Deemed to be University)
IZATNAGAR-243 122 (UP) INDIA

Website : www.ivri.nic.in

• Availability of Information Bulletin & application form on IVRI Website	March 15, 2018 onwards
• Last date for receipt of filled-in application form	April 10, 2018 (upto 5:00 pm.)
• Last date of receipt of filled-in application form - candidates of Andaman & Nicobar Island, Lakshadweep, (State/Union Territory in the North Eastern Region, Ladakh Division of J&K State & Sikkim)	April 20, 2018 (upto 5:00 pm.)
• Date of Written Entrance Examination	May 06, 2018
• Declaration of Result of Written Examination on IVRI Website	Last week of May, 2018
• Interview Schedule	June 11 to 22, 2018
• Final Result on IVRI Website	First week of July, 2018
• Date of Registration/Admission-	August 1-3, 2018
• Date of Registration/Admission with late fee	August 4-7, 2018
• Date of Registration/Admission for Wait list Candidates	August 8-10, 2018 (I Waiting) August 13-16, 2018 (II Waiting)
• Last Date of Admission	August 16, 2018
• Commencement of first semester	August 01, 2018
• Orientation Programme	August 18, 2018

Note: Application form and Information Bulletin are available only on IVRI website www.ivri.nic.in and can be downloaded from there.

1. INTRODUCTION

The Indian Veterinary Research Institute (IVRI) was established on 9th December, 1889 as Imperial Bacteriological Laboratory at Pune (Maharashtra) and was later shifted to Mukteswar in 1893. Mukteswar was chosen because of its Eco-Geo-Physical suitability for research on infectious diseases. Subsequently, for large-scale production of serum and vaccines, Izatnagar, Bareilly (UP) campus was established in 1913. The Institute was gradually expanded to the present size with its headquarters at Izatnagar (UP) and campuses at Mukteswar, Bengaluru, and regional stations at Palampur, Kolkata and Pune. Research conducted in the Institute in the areas of animal health and production with multidisciplinary approach has paid rich dividends. The research contributions have facilitated development of new biologicals used for diagnosis, prevention, cure and control of many devastating animal & poultry diseases and increased production of milk, meat, eggs and other animal products. Improvement of livestock and poultry with increased production potential and substitution of conventional feeds by cheaper agro-industrial byproducts are other significant contributions. Post-graduate teaching and training programmes started in 1900 at the Institute with imparting training to field veterinarians, civil and army personnel on various aspects of animal healthcare. Later, Associateship of IVRI and National Diploma courses were added as part of post graduate teaching programme. With the establishment of Post-Graduate College of Animal Sciences in 1958, Postgraduate degree programmes also started. Upto the year 2016-2017 the Institute has been providing quality education at masters' and doctoral levels in 22 and 19 disciplines, respectively. From the academic year 2017-18, this Deemed to be university will impart MVSc & Ph.D degree in 19 & 17 disciplines respectively. The Institute has been conferred the status of Deemed to be University with effect from 16th November, 1983 under Section 3 of the University Grants Commission Act (1956). The first academic session as Deemed to be university started on 15th January, 1985. The Institute has been attracting a large number of foreign students, especially from developing countries. Students/Researchers have been deputed to this Institute from different countries for various short-term and long-term training programmes, diplomas and degree courses. Besides postgraduate degree courses, the institute has also been conducting various short-term National and International Training Programmes, Short Courses from time to time to make the professionals familiar with the latest developments in Veterinary and Animal Sciences. From the academic session 2015-16, the institute has initiated under-graduate programme in Veterinary Sciences (BVSc & AH) with intake of 20 students. The Institute has also been recognized as the Centre for Advanced Faculty Training in Animal Nutrition and Animal Physiology & Climatology by ICAR, New Delhi. It has a well established National Library of Veterinary Sciences, Bioinformatics Centre, ARIS Cell, Animal and Fodder Farms, Boys' and Girls' Hostels, Bank and Post Office facilities at its Izatnagar campus. The Institute is spread over an area of 440.50 acres and is located at a distance of 258 km from New Delhi and about 8 km from Bareilly Jn. and 1 km from Izatnagar Railway Station. The administrative control of the Institute is vested with the Indian Council of Agricultural Research (ICAR).

2. AUTHORITIES (DEEMED TO BE UNIVERSITY)

- (a) **The Director & Vice Chancellor** is the Principal Executive Academic Officer of the Institute and exercises powers as delegated to the Vice-Chancellors of other Universities in University affairs.
- (b) **The Joint Director (Academic) & Dean** is responsible for the organization and implementation of the teaching programmes and co-ordination of post-graduate studies and research in all the disciplines of the Deemed to be university.
- (c) **The Registrar** is responsible for maintenance of all records related to performance of the

students, assistance in admissions, establishment matters and general administration in the Deemed to be University.

- (d) **The Controller of Examination** is responsible for conducting various examinations and maintenance of all records of Examinations, and related matter in the Deemed to be University.
- (e) **The Academic Coordinator** is responsible for coordinating academic matters of the Deemed University.
- (f) **The Coordinator (UG Programme)** is responsible for coordinating academic matters related to U.G. (BVSc &AH) programme of the Deemed to be University.
- (g) **Student Welfare Officers (Boys/Girls)** are responsible for students' welfare & extra-curricular/co-curricular activities improving competency among the students and increasing national and international collaborations.
- (h) **Chief Hostel Warden (Boys/Girls)** is responsible to look after the hostel activities and matters relating to the hostels and students care and discipline.
- (i) **Nodal Officers, Nodal Cell (Education Division), ICAR** are responsible for coordinating different financial and other activities of ICAR and compilation of reports of Deemed to be university for onward transmission to Education Division, ICAR Nodal Cell at IVRI will also act as Single Window System (SWC).
- (j) **Experiential Learning Programme (ELP) Coordinator** is responsible for coordinating Skill Oriented hands-on training for UG students and development and establishment of experiential learning units in the areas of animal health, production and value addition.

3. ACADEMIC SESSION AND TERM CALENDAR

The academic year of the Institute is comprised of two semesters, each approximately of 20 weeks duration. The date for programme of studies of each semester in a particular academic year is decided by the Institute well in advance. The time schedule of the academic year 2018-19 is given below:

- I Semester : August to January
- II Semester : February to July

TERM CALENDAR I Semester:

Sl. No.	Events	1 st Semester (August-January)
1.	Registration of all P.G. Students	01.08.18 to 03.08.18
2.	Payment of Institute/Hostel fee (For Fresh Students)	01.08.18 to 03.08.18
3.	Last date of submission of (Hard copy of online printed) roster forms by all the students	06.08.18
4.	Date for Admission/Registration and payment of Institute/ Hostel fee with late fee (for fresh students)	04.08.18 to 07.08.18
5.	Date of Registration of Existing Students	01.08.18
6.	Payment of Institute/Hostel fee (for existing students)	04.08.18 to 06.08.18
7.	Last date for Admission/Registration and payment of Institute/ Hostel fee with late fee (for existing students)	07.08.18
8.	Last date for adding/dropping the course	17.08.18

9.	Orientation Programme of first year students	18.08.18
10.	Date of submission of details of courses registered by each student (by the HDs) in the prescribed proforma	23.08.18
11.	Internal Preliminary Examination (Major/Minor) for Ph.D. II year	14.08.18 to 31.08.18
12.	Last date of submission of result of internal Preliminary Examination	04.09.18
13.	External Preliminary Examination	14.09.18
14.	Preliminary Viva Voce Examination	01.10.18 to 15.10.18
15.	Quiz Examination	15.09.18 to 22.09.18
16.	Last date of submission of result of Quiz	29.09.18
17.	Mid-term examination	27.10.18 to 08.11.18
18.	Last Date of submission of result of Mid-term examination	14.11.18
19.	Last date of submission of result of Special problem, Seminar & assignment	29.11.18
20.	Final examinations for Audit Courses	30.11.18 to 05.12.18
21.	Last date of submission of result of all Audit Examinations	06.12.18
22.	Semester-end final examination	15.12.18 to 16.01.19
23.	Semester Break	17.01.19 to 31.01.19
24.	Declaration of Result of Semester end examination	31.01.19

TERM CALENDAR II Semester:

Sl. No.	Events	2 nd Semester (February-July)
1.	Registration/admission	01.02.19
1(A)	Date for payment of Registration and Institute/Hostel fee	01.02.19 to 04.02.19
2.	Last date of submission of roster forms	05.02.19
3.	Date for payment of Registration and Institute/ Hostel fee with late fee	05.02.19.to 07.02.19
4.	Last date for adding/dropping a course	16.02.19
5.	Last date of submission of details of courses registered by each student in the prescribed proforma by the HDs	20.02.19
6.	Quiz Examination	16.03.19 to 21.03.19
7.	Last date of submission of result of Quiz	28.03.19
8.	Internal Preliminary Examination (Major/Minor) for Ph.D. II year	14.03.19 to 30.03.19
9.	Last Date of submission of result of internal Preliminary Examination	04.04.19
10.	External Preliminary Examination (for Ph.D II year)	16.04.19
11.	Preliminary Viva Voce Examination	01.05.19 to 15.05.19
12.	Mid-term examination	30.04.19 to 07.05.19
13.	Last Date of submission of result of Mid-term examination Mid-Term examination	16.05.19
14.	Last date of submission of result of Special problem, Seminar & assignment	30.05.19
15.	Final examinations for Audit Courses	25.05.19 to 30.05.19
16.	Last date of submission of result of all Audit Course Examinations	30.05.19
17.	Deadline for submission of Thesis by the MVSc II year students	29.06.19
18.	Semester-end final examination	01.06.19 to 29.06.19
19.	Semester Break	30.06.19 to 31.07.19
20.	Declaration of Result of Semester end examination	31.07.19

NOTE: In case, holiday falls on any above date, the schedule will be shifted to next working day.

4 . ADMISSION

4.1 Admission to PhD Programmes: Admission will be held on the basis of All India Written Entrance Examination followed by an Interview and further subject to Medical/Physical Fitness of the candidate. Name and Roll Nos. of eligible candidates will be displayed on IVRI website. The entrance examination will be conducted at the following Centres. In case sufficient number of candidates does not opt for a particular centre, it will be merged with another centre: -

S.No.	Name of Examination Centres	Centre Code
(a)	IVRI, Izatnagar, Bareilly (UP)	01
(b)	IVRI Campus, Bangalore (Karnataka)	02
(c)	IVRI Regional Station, Kolkata (W.B.)	03
(d)	IVRI Regional Centre, Palampur (H.P.)	04
(e)	IVRI Regional Centre, Pune (Maharashtra)	05
(f)	National Institute of High Security Animal Diseases, Anand Nagar, Bhopal (MP)	06

4.2 Important instructions to the candidates

- i. Admission to the Institute implies acceptance, without any modification, by the student and his/her parents/guardians of all provisions given in the bulletin or any change in the Institute rules, regulations, fee, etc. that are notified from time to time.
- ii. If any document or information submitted by the candidate is found to be false at any stage during his/her stay in the Institute, his/her admission will be liable to be cancelled.
- iii. Any candidate admitted in the University earlier and left the MVSc/ PhD programme in violation of rules of the Deemed to be university or found guilty of violating any rule of the University will not be eligible for re-admission. In case any candidate discontinued the degree programme without completing their study, their candidature for admission will be considered only subject to clearance of Institute's dues as per university norms.
- iv. The information indicated in the bulletin is only for general guidance and may be modified/changed from time to time by the University. **The information bulletin shall not be treated as a legal document.**
- v. The results of the entrance examination and interview declared by the Deemed to be university & displayed on IVRI Website shall be treated as final. There is no provision for scrutiny/ re-evaluation of answer books.
- vi. In case of any legal dispute, the same shall be subject to Bareilly Court's jurisdiction only.

4.3 Programmes

The main subjects/disciplines of study in which various degrees will be offered are as follows:

S.No.	Disciplines	Subject Code
1.	Animal Biochemistry (BCT)	01
2.	Animal Biotechnology (BTY)	02
3.	Animal Genetics and Breeding (AGB)	03
4.	Animal Nutrition (ANT)	04
5.	Livestock Production and Management (LPM)	05
6.	Livestock Products Technology (LPT)	06
7.	Poultry Science (PSC)	07
8.	Veterinary Microbiology (VMC)	08
9.	Veterinary Extension Education (EXT)	09
10.	Veterinary Gynaecology and Obstetrics (VGO)	10
11.	Veterinary Medicine (VMD)	11
12.	Veterinary Parasitology (VPA)	12
13.	Veterinary Pathology (VPL)	13
14.	Veterinary Pharmacology (VPT)	14
15.	Veterinary Physiology (VPY)	15
16.	Veterinary Public Health & Epidemiology (VPE)	16
17.	Veterinary Surgery & Radiology (VSR)	17

4.4 Eligibility for Admission

The candidates for admission to PhD programme must have MVSc degree in the concerned discipline as specified below with a minimum CGPA 6.50/10.00 scale, 3.25/5.00 scale, 2.60/4.00 scale for General and OBC categories and 5.50/10.00 scale, 2.75/5.00 scale, 2.20/4.00 scale for SC/ST/Divyang/ Sponsored candidates, respectively from any recognized University in India or where grade-points are not awarded and only marks are awarded, the candidate must have secured atleast 60% marks for General/OBC category. For SC/ST/Divyang/Sponsored category candidates, the minimum percentage of marks will be 50%. The eligibility qualifications in various disciplines are as specified below:

Sl. No.	Name of Discipline	Eligibility
1.	Animal Biochemistry	BVSc & AH with Master's degree in concerned discipline
2.	Animal Biotechnology	BVSc & AH with Master's degree in Biotechnology/ Animal Biotechnology
3.	Animal Genetics and Breeding	BVSc & AH with Master's degree in concerned discipline
4.	Animal Nutrition	BVSc & AH with Master's degree in concerned discipline
5.	Livestock Production and Management	BVSc & AH with Master's degree in concerned discipline
6.	Livestock Products Technology	BVSc & AH with Master's degree in Livestock Products Technology (LPT)/Animal Products Technology/Meat Science and Technology/Dairy Science
7.	Poultry Science	BVSc & AH with Master's degree in concerned discipline

8.	Veterinary Microbiology	BVSc & AH with Master's degree in: Veterinary Microbiology/ Veterinary Bacteriology/ Veterinary Virology/ Veterinary Immunology
9.	Veterinary Extension Education	BVSc & AH with Master's degree in concerned discipline.
10.	Veterinary Gynaecology and Obstetrics	BVSc & AH with Master's degree in concerned discipline
11.	Veterinary Medicine	BVSc & AH with Master's degree in concerned discipline
12.	Veterinary Parasitology	BVSc & AH with Master's degree in concerned discipline
13.	Veterinary Pathology	BVSc & AH with Master's degree in concerned discipline/ Avian Diseases
14.	Veterinary Pharmacology	BVSc & AH with Master's degree in concerned discipline
15.	Veterinary Physiology	BVSc & AH with Master's degree in concerned discipline
16.	Veterinary Public Health & Epidemiology	BVSc & AH with Master's degree in Veterinary Public Health and Epidemiology/Veterinary Public Health/Veterinary Epidemiology/ Epidemiology/Public Health/Pathobiology.
17.	Veterinary Surgery & Radiology	BVSc & AH with Master's degree in concerned discipline

4.5 (a) Subject-wise number of seats (OPEN Category)

Sl. No.	Name of Discipline	Subject code	GEN	SC	ST	OBC	Total
1.	Animal Biochemistry	01	2	1	0	1	4
2.	Animal Biotechnology	02	2	0	1	1	4
3.	Animal Genetics and Breeding	03	2	1	0	2	5
4.	Animal Nutrition	04	3	0	1	1	5
5.	Livestock Production and Management	05	2	0	0	1	3
6.	Livestock Products Technology	06	1	0	0	1	2
7.	Poultry Science	07	1	1	0	1	3
8.	Veterinary Microbiology*	08	7	2	1	3	13
9.	Veterinary Extension Education	09	1	1	0	0	2
10.	Veterinary Gynaecology and Obstetrics	10	2	0	1	1	4
11.	Veterinary Medicine	11	2	0	0	2	4
12.	Veterinary Parasitology	12	2	1	0	1	4
13.	Veterinary Pathology	13	2	1	0	1	4
14.	Veterinary Pharmacology	14	1	0	0	1	2
15.	Veterinary Physiology	15	2	1	0	1	4
16.	Veterinary Public Health & Epidemiology**	16	3	1	1	1	6
17.	Veterinary Surgery & Radiology	17	2	1	0	1	4
	Total		37	11	5	20	73

Remarks: The Seats of Veterinary Microbiology* and Veterinary Public Health and Epidemiology (VPE)** will be filled-up on the basis of merit. The breakup of seats of Veterinary Microbiology is as below:

Veterinary Bacteriology	5
Veterinary Virology	6
Veterinary Immunology	2

Similarly, the breakup of seats of Veterinary Public Health & Epidemiology is as below:

Veterinary Public Health	4
Epidemiology	2

Reservation of Seats: S.C.- 15% = 11 Seats, S.T. – 7.5% = 05 Seats, OBC – 27% = 20 Seats and Divyang-3% = 2 seats, *Horizontal reservation to be given for Divyang Category candidates as per their merit against the category *i.e.* General/SC/ST/OBC to which they belong).

4.5 (b) One Sponsored candidate (In-service) shall be admitted in each discipline over and above the normal seats. No reservation in sponsored category seats will be applicable. This will be purely on the basis of divisional common merit amongst the in-service candidates in the entrance examination.

4.6 Procedure for application:

1. Information Bulletin and Application form for admission to PhD programme can be downloaded from Institute website (www.ivri.nic.in) and should be submitted alongwith the printed e-receipt downloaded from the State Bank Portal, of Rs. 1200/- for General/OBC/Sponsored/ Divyang (General, OBC) category and Rs. 1000/- for SC/ST/ Divyang (SC,ST) category candidates. The requisite fee as per applicable category can be deposited online through 'FEES' link in 'Student Fee Deposit Gateway' on the website of IVRI- (Link: <https://www.onlinesbi.com/prelogin/collecthome.htm?corp ID=640979>).
2. The application form bears a serial number at the top right corner on page No.1. This may be left blank as it is for Office use only. All the particulars in the Application form viz. Discipline Name, Discipline Code, Subject Code and other details should be carefully filled.
3. All applications, duly completed in all respects with all documents required should be sent so as to reach the Assistant Administrative Officer (Academic), IVRI, Izatnagar- 243 122 (up) on or before **10th April, 2018 (5:00 PM)** (closing date). The last date for candidates in the Andaman & Nicobar Island, Lakshadweep, States/Union Territory in the North Eastern Regional, Ladakh Division of J&K State and Sikkim is **20th April, 2018 (5:00 PM)**. **Postal delay will not be accepted as a legitimate reason to entertain application received after the last date.** The envelope containing the application form should be superscripted in capital letters, "**APPLICATION FOR ADMISSION TO Ph.D PROGRAMME 2018-19**".
4. In case, a candidate has appeared for the qualifying degree examination for admission and the result has not been announced in time for him/her to submit the application by the due date, he/she may still complete the application in all respects, except the academic record relating to last examination and submit it by the closing date specified above. However, course completion certificate indicating percentage of marks or CGPA obtained from the Registrar/Principal/Dean/Head of Department of College must be submitted alongwith application form, failing which the application form will liable to be rejected without any communication in the matter. **The candidate will be required to submit his/her qualifying degree certificate (Provisional Degree Certificate) on his/her successful completion of the Master's degree programme at the time of registration/admission. The Provisional Degree Certificate (PDC) is a mandatory requirement to all the candidates before admission.**

5. A candidate can apply for either under **OPEN OR SPONSORED** Category, as the case may be. The choice once exercised will be final.
6. Employed candidates applying under open category, **must submit their “No Objection Certificate (NOC)” alongwith relieving order from his/her employer at the time of admission, failing which their candidatures will be treated as cancelled. This is a mandatory requirement to all such candidates.**
7. The candidate is advised in his/her own interest to fill up the application form carefully and accurately and to ensure that all the testimonials/certificates and final CGPA card with the application are enclosed. All enclosures must be numbered. The candidates are also advised to retain atleast four copies of Photographs, same as pasted on the Application Form, for subsequent use during admission.
8. The candidates are advised to retain one copy of admit card with them, paste recent passport size self attested photograph and note down the roll number as displayed on IVRI website. The admit card will be mandatory to be produced in the Examination Hall.
9. **If a candidate furnishes wrong information or suppresses any relevant information, his/her candidature/ admission will liable to be cancelled.**
10. (i) Self attested photocopy of the following certificates/documents are mandatory and need to be enclosed with the application form, failing which the application will be rejected.
 - a. Matriculation (Class X) certificate and marksheet for date of birth proof.
 - b. Bachelor’s degree (BVSc. & A.H.) Certificate and Transcript.
 - c. Master’s degree certificate and Transcript
 - d. In the absence of Master’s degree certificate & transcript, and for continuing students, course completion certificate indicating percentage of marks or final CGPA obtained from the Registrar of the University/Principal/Dean/HD of the college.
 - e. Scheduled Caste/Scheduled Tribe/OBC certificate as per annexure-IV or V from the authority empowered to issue such certificate of verification, wherever necessary. Until the certificates are verified from the competent authority, the admission under these reserved quotas will be treated as provisional.
 - f. Documentary evidence of employment from the employer(s) in case of in-service candidates.
- (ii) The following additional certificates/documents are required at the time of admission in original:
 - a. Character Certificate issued by the last Institution/University attended, in original.
 - b. Migration Certificate, issued by the last Institution/University attended, in original.
 - c. Certificate of physical fitness issued **not earlier than three months before the date of admission** in the prescribed proforma, issued by Chief Medical Officer of a District or Chief Medical Superintendent of Govt. Base Hospital. Proforma of Medical Certificate is enclosed as ‘Annexure-IX’.
 - d. All original certificates and marks sheets as well as photocopy are to be produced at the time of admission. Candidates who don’t produce all the original certificates and marks sheets will not be admitted.
11. All correspondence for admission should be addressed to the Assistant Administrative Officer (Academic), IVRI, Izatnagar-243 122, Bareilly (UP) India.

4.7 Submission of Application

The last date for receipt of application duly completed in all respect shall be **10.04.2018 till 5:00 PM**. No application shall be accepted after the due date and time. The last date for candidates in the Andaman & Nicobar Island, Lakshadweep, States/Union Territory in the North Eastern Regional, Ladakh Division of J&K State and Sikkim is **20.04.2018 (5:00 PM)**.

4.8.1 Admission of Sponsored Candidates

In-service candidates from ICAR Institutes, Central/State Agricultural/Veterinary Universities and other Central/State Government Organization/Departments will be considered for PhD degree programmes only if they are sponsored by their employers on deputation/study leave subject to fulfillment of eligibility requirements already mentioned for open candidates as per 4.4.

The in-service (Sponsored) candidates may submit an advance copy of the application form alongwith the prescribed fee so as to reach on or before the closing date of receipt of application i.e. **10th April, 2018** (upto 5:00 PM) and the last date for candidates in the Andaman & Nicobar Island, Lakshadweep, States/Union Territory in the North Eastern Regional, Ladakh Division of J&K State and Sikkim is **20th April, 2018 (5:00 PM)**. The copy of application form through proper channel along with duly signed sponsorship certificate by the employer, should reach on or before the date of admission.

The in-service (Sponsored) candidates of ICAR Institutes, Central/State Agricultural/Veterinary Universities, Central/State Govt. Departments etc. for promoting faculty up-gradation may depute their faculty/employees for admission to Doctoral Programme subject to the following conditions:

- (i) The candidate must be sponsored by his/her employer. The eligible candidates will have to appear and qualify in the written examination followed by interview for PhD admission as per university notification and Information Bulletin. Separate merit list will be prepared for the eligible sponsored candidates in each discipline. The result of eligible candidates will be displayed on IVRI website.
- (ii) One Sponsored (In-service) candidate shall be admitted in the PhD degree programme in each discipline over and above the normal seats.

4.8.2 Foreign Students

- i) Foreign students seeking admission shall forward their applications through their respective Embassies or through their respective Indian Missions abroad to the Government of India/Deputy Director General (Education), ICAR, Krishi Bhawan, New Delhi for consideration of their eligibility for admission, etc. The foreign nominees are also required to possess the required qualifications. However, no percentage of marks is fixed for them.
- ii) Foreign students having DVM Degree will have to undergo for at least one year (two semesters) deficiency courses of 30-35 credit hours, if they wish to take admission to the PhD degree programme at this Institute.
- iii) Foreign students should also have proficiency in English both written and spoken, as the medium of Instruction/teaching is English. A certificate of Proficiency in English language has to be produced by the student.
- iv) Foreign students sponsored for study at this Institute should arrive at Bareilly, preferably one week before the start of the academic session to acquaint themselves with the activities of the Institute and to attend the orientation programme. They should contact the Assistant

Administrative Officer (Academic) at the University Office upon arrival for obtaining guidance concerning registration procedure, campus information and all other matters.

- v) Foreign students seeking admission to this Institute are required to give an undertaking for undergoing medical examination as per Government of India norms, after arrival in India and their admission will be finalized only after the medical tests have been completed and they are declared fit.
- vi) The student/ his/ her sponsoring Government will be required to pay the Institutional Economic Fee @ US \$ 400 per month or US \$ 4000 per annum, in addition to the usual fee/charges of the university.

4.9 Reservation

15% seats for Scheduled Caste, 7.5% seats for Scheduled Tribe, 27% seats for Other Backward Category (OBC) and 3% for Divyang candidates are reserved.

4.9.1 In case seat under SC/ST category remains vacant due to non-availability of eligible SC/ST candidate, the seat will be interchangeable in a particular discipline amongst the eligible SC/ST candidates. Even after that if the seat is vacant in SC/ST category, it will not be filled from any other category candidates.

4.9.2 In case any OBC reserved seat remains vacant due to non-availability of eligible OBC candidates, the said OBC seats shall be filled up amongst the un-reserved category candidates of the same subject/discipline as per merit.

4.9.3 Two seats (3%) will be reserved for Divyang candidates as per their merit on horizontal basis.

4.9.4 The reservation is applicable only in case of candidates admitted under open category and not under sponsored category.

The details of allocation of seats reserved for various categories have been shown in the Information Bulletin at Para 4.5 (a) allocation of seats.

4.10 Age limit

Minimum age limit for PhD candidates shall be 23 years. There will be no upper age limit. The age shall be reckoned as on 1st August of the academic session.

5. SELECTION CRITERIA, WRITTEN ENTRANCE EXAMINATION AND INTERVIEW

5.1 Entrance Test

There shall be one written paper of 190 marks for the subject matter and 10 marks for the interview. Candidates who qualify in the written examination in the subject, based on the academic performance are eligible to appear in the interview.

Selection Criteria

- (A) Written examination (Total 190 marks)
- (B) Interview (Total 10 marks)
- i. The candidates who fulfill the prescribed minimum qualifications are only eligible to appear in the competitive written entrance examination.
- ii. The minimum qualifying marks in the competitive entrance examination for appearing in the interview for admission to PhD programme shall be as under:

Examination	Minimum qualifying marks in Competitive entrance test		
	General Candidates	OBC Candidates	SC/ST Candidates
Subject matter of 190 marks	50% (95 marks out of 190)	48% (91.2 marks out of 190)	45% (85.5 marks out of 190)

		Say 91 marks out of 190	Say 85 marks out of 190
--	--	-------------------------	-------------------------

Note: The minimum qualifying marks for Divyang candidates will be same as for the category he/she belongs to i.e., SC, ST, OBC or General.

(a) Subjects for written examination

The candidates may appear in the written examination in any one of the subject in which admission is to be taken. The question paper will contain multiple choice questions. The syllabus for the examination will be given in the information bulletin. The medium of examination will be English only.

(b) Venue, date, time and centre of examination

1. The written entrance examination for PhD degree programme shall be held on **6th May, 2018** at the following centres from 11.00 AM to 1.00 PM or as specified by the Deemed to be university at the time of advertisement. In case sufficient numbers of candidates do not opt for a particular centre, it will be merged with other centres:

S.No.	Name of Examination Centres	Centre Code
(a)	IVRI, Izatnagar, Bareilly (UP)	01
(b)	IVRI Campus, Bangalore (Karnataka)	02
(c)	IVRI Regional Station, Kolkata (W.B.)	03
(d)	IVRI Regional Centre, Palampur (H.P.)	04
(e)	IVRI Regional Centre, Pune (Maharashtra)	05
(f)	National Institute of High Security Animal Diseases, Anand Nagar, Bhopal (M.P.)	06

2. No TA/ DA for appearing in the written examination/interview will be paid by the institute. However, only eligible un-employed SC/ ST candidates who appeared in the written examination/interview will be paid traveling allowance on the basis of confirmed ticket limited to sleeper class railway fare by the shortest route both ways on production of caste certificate and evidence of journey performed. Payment of TA will be made through online account transfer for which details of Bank account with IFSC Code must be submitted by the candidate.
3. The candidates will have to make their own arrangements for boarding and lodging during the period of stay for entrance examination.

5.2 Duration and Type of Entrance Examination

The entrance examination in the subjects as per given choice will be of 2 hours duration and will contain 190 multiple choice questions. The candidate will be given separate answer sheet to mark one correct answer out of four choices given. The candidate will have to return the question booklet and OMR Sheets after the end of examination to the invigilators.

5.3 Interview

Candidates, who qualify in the written examination in the subject, are eligible to appear in the interview. Discipline-wise list of qualifying students in the entrance examination is prepared and displayed on IVRI Website.

Venue of Interview

The interview of the candidates, who have declared qualified in the written examination, will be held from **11th June, 2018 to 22nd June, 2018** in the **Deemed to be university Building, IVRI, Izatnagar** only as per the schedule notified in the written examination result on IVRI Website.

1. The interview should be of maximum 10 marks. It is the mandatory to appear in the Interview for all the candidates who have declared qualified & called for the interview. Interview means to judge candidate's subject matter knowledge and also discuss the research interest/area.
2. The candidates called for interview have to appear before a duly constituted Interview Board. The interview is held at **IVRI, Izatnagar only**. Before appearing in the interview, the students have to produce their all original documents before the Admission Committee for screening. In case a candidate has already submitted an attested copy of marks-sheet or course completion certificate of the qualifying examination issued by the Registrar of the University concerned/Principal of the

college, but is unable to produce the original at the time of interview as the mark-sheet had been submitted to another university or any other bonafide reason, he/she may be allowed to appear in the interview, provided that, if selected, his/her admission would be subject to production of original certificate, failing which his admission is liable to be cancelled. An undertaking to this effect should be given by the candidate. Merely appearing in the written examination/interview is not the guarantee for admission to PhD programme.

5.4 Announcement of Result

1. On the basis of the total marks obtained by each candidate in written examination and interview, the final result should be compiled in descending order of merit by the Office of the Controller of Examination in respect of all the candidates. The SC/ST candidates will be shown as a separate category in the merit list.
2. The final list of candidates, as per merit in each discipline for admission to PhD degree programme for both open and sponsored seats will be displayed on the institute's website (www.ivri.nic.in.) in the **first week of July, 2018**.
3. The marks obtained by the candidates in the final selection are worked out up to the first decimal place; the decimal fraction of 0.05 or above occurring at the second decimal place being rounded off upwards and those of 0.04 or below being ignored. In case of tie, admission will be given to the candidate whose written test marks are higher. Again in case of tie, admission will be given to the candidate on the basis of marks obtained in their MVSc degree and then BVSc degree. In case of tie even in the above, the candidate older in age will be admitted.

6. RIGHT TO REFUSE ADMISSION

The Director cum Vice-Chancellor, IVRI reserves the right to refuse admission to any candidate without assigning any reason thereof. The decision of the Director shall be final and legally binding.

7. ORIENTATION PROGRAMME

In order to make all fresh students and sponsored students fully conversant with the requirement and working of the course credit system of instruction followed at this Institute, an Orientation Programme will be held on **18th August, 2018, in which participation of all the newly admitted students is compulsory.**

8. REGISTRATION OF STUDENTS

8.1 All the selected students will be required to be medically examined by the concerned Medical Authority (Chief Medical Officer or Chief Medical Superintendent of Government base Hospital) and submit the Medical Certificate of fitness in the prescribed proforma as per Annexure-IX. Further, the selected students shall also requires to submit a surety bond, duly signed by the Notary at the time of Admission/Registration as per format enclosed in Annexure-III, failing which his/her admission/registration will not be accepted.

Every student enrolled shall be required to register at the beginning of each semester, as per calendar, till the completion of his/her degree requirements, including final viva-voce. Re-admission of such case shall be on application supported with valid justification and not as a matter of right. Registration shall consist of the following steps:

- (a) Filling up the roster forms for course(s) to be offered in that semester.
- (b) Submission of progress report for the preceding semester.
- (c) Payment of the fee and other dues.
- (d) Depositing the prescribed registration forms duly filled in by the student and signed by the Head of Division through divisional messenger, as per university schedule.
- (e) Proforma for the Fellowship is to be enclosed as per Annexure-X

The Registration for the first semester of the year for fresh students is a part of the admission procedure and shall be governed by the admission rules. Registration in respect of continuing students in each semester shall, however, be completed on the first day of each semester and the classes shall commence thereafter.

The Registration of continuing students shall not be permitted later than the last date of registration with late fee approved by the Joint Director (Academic). If during the registration days, a student is required to be outside the Institute campus on the basis of prior permission, in connection with his/her studies, field work, research work or due to other unavoidable and legitimate circumstances, he/she may be permitted by the Joint Director (Academic) to register himself/herself by submitting the necessary registration forms and fee through post. A continuing student who does not register on the notified date shall be required to pay a late fee of Rs. 500/- or as may be prescribed by the Institute.

In case, the name of a student is dropped out/struck off for a semester, re-registration of the student may be done only after the approval of Joint Director (Academic). The student will be required to submit the re-registration fee of Rs. 50/- in addition to late fee in the next semester.

8.2 RAGGING

Ragging is totally prohibited in the campus and all the students shall observe and abide by the rules & UGC regulations on curbing the menace of ragging in higher educational institutions 2009 under Section 26(1)(G) of the University Grant Commission Act 1956 dated 17.06.2009 published in the Gazette of India part-III, Section 4. Any student found guilty of ragging and/or abetting ragging, whether actively or passively or bearing a part of a conspiracy to promote ragging is liable to be punished in accordance with the aforesaid regulations. If any incident of ragging comes to the notice of authorities of the Deemed to be university, IVRI, the concerned students shall be given liberty to explain and if his/her explanation is not found satisfactory, the authority would expel him/her from the Institute.

All the students have to submit an affidavit on plain paper as per Annexure-VII and VIII of the Information Bulletin. This may also to be uploaded at www.antiragging.in and www.amanmovement.org

9. CANCELLATION OF REGISTRATION

The Director may cancel the registration of any student or group/batch/class of students who indulge(s) in the act of indiscipline, misconduct, violation of rules and regulations of the University, strikes, absence from classes without permission or without any valid reason or in whose case, the Director has reasons to believe that his/her continuance in the University would not be in the best interest of University.

The students, who have been permanently dropped from this University either on account of poor academic performance or on account of acts of indiscipline or misconduct, shall not be eligible to make an application for re-admission to this Institute.

It is the responsibility of the candidates to furnish full and correct information on the application form. Any admission made on the basis of wrong information supplied by the candidates or through a clerical mistake in the Registrar's Office and detected subsequent to the admission and joining of the candidate, would be cancelled at the cost and risk of the student.

10. SYSTEM OF EDUCATION

- A. Semester System of Education is followed for both Internal and External examinations.
- B. The 10.00 points scale for grading is followed for completing degree required in Post Graduate Degree programme. Students must get CGPA of 7.00/10.00 for Doctoral programmes.
- C. The students may also be sent for thesis research work to other Campuses/ Centres of IVRI and also other ICAR Institutes apart from IVRI, Izatnagar.

The details regarding examination evaluation, attendance & leave, Advisory Committees, Allotment of Advisors, Preliminary Examinations, Seminars, Thesis evaluation & Viva-Voce examination, and all other matters relating to the degree programmes are given in the Academic Regulations of the Deemed to be university.

11. HOSTEL ACCOMMODATION

There is one International Trainees Hostel, four Boys Hostels and three Girls hostels with wi fi facilities. The hostel accommodation will be allotted to students selected for PhD programmes on merit basis.

12. FEE AND OTHER CHARGES

12.1 The following fee and charges (likely to be revised) shall be payable by a full time student (MVSc/PhD) admitted to the Institute.

The requisite fee as per applicable category can be deposited online through 'FEES' link in 'Student Fee Deposit Gateway' on the website of IVRI. (Link: <https://www.onlinesbi.com/prelogin/icollecthome.htm?corpID=640979>). The printed e-receipt downloaded from the State Bank Portal, is to be submitted along with other documents, submitted at the time of registration of admission.

1.	Caution money (Refundable at the time of leaving, payable once on admission)	Rs. 10,000.00

8.	A late registration fee to be imposed on first day after due date.	Rs. 500.00

NOTE: Bonafide/character certificate will be issued free of charge.

Fee of foreign students will be charged according to the instructions of the Government of India and agreement reached with the foreign countries/international agencies.

13. FELLOWSHIP/SCHOLARSHIP

Institute Scholarship will be offered to assist the students who need financial assistance. This provision will be utilized to assist as many students as possible who have good academic record and who are making diligent efforts to pursue higher education. No student/ scholarship holder shall apply for or accept any other scholarship/ award/ employment without prior approval of the Joint Director (Academic). The details of the various scholarships available are indicated below:

13.1 Institute Scholarship

The Indian Veterinary Research Institute will award scholarship to PhD students on the following terms and conditions:

IVRI Scholarship is admissible to only those candidates who are admitted through competitive entrance examination for PhD degree programmes. The award to the fresh students shall be made by the Joint Director (Academic) of the Institute on the recommendation of the 'Standing Committee on Scholarship, Financial Assistance and Academic Progress' which shall take into consideration the merit of each applicant based initially on his/her admission and subsequently on his/her performance at the Institute.

13.1.1 Duration of scholarship

The duration of scholarship for PhD course will be of three years.

Initially the scholarship will be sanctioned for one year. It is essential to maintain a CGPA of 7.00 out of 10.00 at the end of each semester for Doctoral Degree students for getting the Scholarship. No Scholarship will be paid for the period, if it is discontinued on account of a CGPA lower than 7.00 out of 10.00. However, after obtaining the required CGPA, the scholarship will be resumed to the students. If a student gets "F" grade in any course other than in English or audit course, he/she will not get fellowship/scholarship until he/she clears the said course(s). However, no arrears of fellowship/scholarship will be paid for the intervening period.

The scholarship shall be paid for the period of stay of the recipient in the Institute (inclusive of the summer vacation/the semester breaks/and such other leaves, as may be sanctioned under the rules) up to the date of final viva-voce (*i.e.* till they are on the rolls) subject to the condition that the maximum period of scholarship prescribed in the Academic Regulation shall in no case be extended and the student marks his/her attendance in the Division/Section concerned.

13.1.2 Amount of scholarship

The amount of the scholarship for Doctoral programme is Rs. 13,125/- per month for three years with a contingent grant of Rs. 10,000/- per annum for three years.

13.1.3 Conditions of Award

The scholarship will be admissible to persons of Indian Nationality, as defined in the Constitution of India or persons domiciled in India, irrespective of sex, race or religion.

The scholar will be under the administrative control of the Joint Director (Academic). He/she will work under a recognized Guide of the Faculty of the concerned discipline.

Each student will have to execute a surety bond for Rs. 50,000/- on a non-judicial stamp paper of Rs. 100/- in the prescribed form attached as Annexure-III duly attested/notarized by the **Notary Public to be submitted on the day of admission/registration positively, failing which his/her admission will not be accepted.** The following person can stand surety for the students:

- a) Parent/Guardian of the student;
- b) Guide/Teachers of the student

- c) Sarpanch of the village panchayat to which the student belongs
- d) MLA
- e) Local guardian of the student, if any
- f) Any other Central Government or State Government or Central Autonomous Bodies or Equivalent status or comparable higher status employees.

The scholarship will take effect from the date the scholar joins the course or from the date of start of academic year, whichever is later.

A scholar will devote his/her whole time to the approved study and will not be allowed to accept or hold another appointment paid or otherwise.

The Institute will not provide to the scholar benefits of Provident Fund. Scholarship will not be given to anyone who is drawing his/her pay on study leave or shall not be adjusted with his/her pay for any other benefits.

A scholar shall not leave the course before its completion without prior approval of the Joint Director (Academic). He/She will be required to give an undertaking in the prescribed format before the scholarship is awarded.

13.1.4 Surety Bond

All students shall submit a surety bond, duly signed by the Notary at the time of Registration/Admission as per Annexure-II as the case may be, **failing which his/her registration/admission will not be accepted.** Proforma of surety bond is at Annexure II of the Information Bulletin.

13.1.5 Termination of Scholarship

The Scholarship will be terminated:

- i) On the date the student ceases to be on the rolls of IVRI.
- ii) On the date the student completes his/her study which may include final viva-voce examination.
- iii) On the date the sanction of scholarship expires.
- iv) If at any time, in the opinion of the Joint Director (Academic), a Student is found to be negligent in his/her work or is guilty of unbecoming conduct, the scholarship will terminate without notice.
- v) If a student completes his/her study before the expiry of sanctioned term of his/her scholarship, the Major Advisor should immediately inform the Joint Director (Academic) for necessary action.

14 . MEDALS AND AWARDS

The University has instituted the following Medals/Awards for encouraging the P.G./Doctoral students:

14.1 Best Student Awards

One Gold, one Silver and one Bronze Medals along with a certificate each to the best Master's and Doctoral degree students will be awarded for securing highest CGPA in their respective programmes. However, if a student has repeated a course or has been given any disciplinary punishment during the course programme, he/she will not be considered for the said award/medal.

14.2 Dr. C.M. Singh Award

The Award will be given to the best PhD thesis in any subject of Veterinary & Animal Science during the particular calendar year.

14.3 Dr. D.R. Uppal Award

The Award will be given for best PhD thesis in the discipline of Veterinary Microbiology (Veterinary Bacteriology/Veterinary Virology/Veterinary Immunology) during the particular academic session.

14.4 Dr. S.K. Talpatra Award

The Award will be given to the PhD scholar having highest OGPA in the discipline of Animal Nutrition during the particular academic session.

14.5 Dr. S.S. Prabhu Award

The Award will be given for best PhD thesis in the discipline of Animal Genetics & Breeding during the particular academic session.

14.6 Dr. Bhagabat Panda Award

The Award will be given to the PhD scholar having highest OGPA in the discipline of Poultry Science during the particular academic session.

15. STUDENTS' WELFARE

15.1 Student Welfare Office

The office of Students Welfare looks after the welfare of students with the support from faculty, administration and IVRI Student Council. This office is working to provide ample scope, opportunities and facilities for the inclusive development of personality and leadership qualities among the students. Students participate effectively in the games & sports, social, cultural, literary, photography & bird watching activities, under the guidance of faculty advisors. Various forums are effectively functioning for the advancement of the professional skills of the students. The Students Welfare Office coordinates the organization of professional lectures, scientific debates, discussions, essay competitions, scientific exhibitions, and poem writing competitions for improving the competency among the students. The office of Students Welfare also looks after the educational activities viz. making meaningful collaborations with national and international organizations, coordinating student's educational tours and excursions for teaching and trainings.

15.2 Medical Facilities

Qualified medical officers look after the health of the students. The Institute dispensary is located within the campus. Medical services are provided to students at the Institute's dispensary and are available round the year.

15.3 Medical Insurance Scheme

Comprehensive Medical Insurance is compulsory for all the students registered at IVRI Deemed to be university. The relevant document/insurance policy is required to be submitted within one month from the date of admission.

15.4 Students Welfare Fund

With a view to render financial aid to students in distress and to support any other student's activities a Student Welfare Fund has been instituted. All students are required to contribute Rs. 100/- for the Fund at the beginning of each academic year.

15.5 Students' Council

All students admitted to this Institute will automatically become members of IVRI Students' Council . However, in the case of students sponsored by various organizations, the sponsoring organizations should indicate in the application form itself whether they would have/would not have any objection to their nominees holding an office in the IVRI Students' Council.

15.6 Placement of Students

The Institute is annually producing, a sizeable number of well-trained competitive professionals with attractive employment opportunities in various sectors such as State and Central Govt., NGOs, Armed Services, Agricultural/Veterinary Universities, R&D jobs in Industry and Central Institutes, including Business and Media Management. The Placement Cell encourage linkages between leading organizations of livestock sector, other prospective employers and out-going post-graduate students to provide assistance in placement of this highly trained human resource.

16. ARIS CELL

The Institute has a well developed Computer Centre with adequate facilities for students for statistical analysis of data, etc. generated out of thesis research work. A Course on Data Processing and Computer Application is offered to the P.G. students by the Centre. Internet, intranet and e-mail facilities are also available.

17. LIBRARY FACILITIES

The National Library of Veterinary Sciences at IVRI has a collection of more than 2,50,000 highly specialized reading material in the form of books, journals, monographs, theses, reference works published data, bulletins, reviews, advances, reports, reprints, micro-documents etc. The library is subscribing about 55 foreign journals and about 70 Indian journals each year. Library is providing full text online access of about three thousand+ journals under CeRA, Education Division, ICAR. Facilities for information, access and retrieval from CD-ROM databases in the multi-user environment is provided using CD-Mirror Hybrid Server on nominal charges. Library has been using KOHA V.3.8 software for automation of library activities. All the PhD theses available in the library have been digitized in PDF form and are available for use in library premises. Library provides E-mail & Internet facilities to its users at 24 terminals during all working hours and days. Three reading sections of the library are air-conditioned. Digital Video Recording based Close Circuit TV system with 22 cameras is being used in the various sections of the library for electronic surveillance. Photocopy facility is also made available in the library at nominal charges.

Rules for Library Facilities for PG students:

1. Five books are issued for 30 days and one journal for overnight to each student. If the issued publications are not returned within prescribed period, a fine is charged as per existing library rules.
2. One soft copy (CD) of the books, if available, is issued to the student for overnight.
3. If the books is torn out and misused while in custody of student/user, he/she shall be required to pay the penalty as decided by the competent authority.
4. If one volume of multi-volume set is damaged or lost while in the custody of the borrower, he/she will be liable to replace whole volume or pay the cost of whole volume alongwith a penalty as may be imposed by competent authority.

5. In case of loss of book, the borrower will be required either to replace the book with the latest available edition or pay the cost of book alongwith a penalty equal to the cost of book.
6. Library provides the reference research facility through CD-ROM in computers and the printouts on the payment basis @ Re 1.00 per page. Photocopy facility is provided on nominal payment @ Re 0.50 per exposure. These rates are subject to change from time to time.

18. COMMUNICATION CENTRE

The Communication Centre provides the necessary support to the scientific community of this Institute as a central facility for photography, art, reprography, printing, publication, information and media coverage.

SYLLABUS FOR WRITTEN EXAMINATION FOR DOCTORAL (PhD) PROGRAMMES**Animal Biochemistry [Code: BCT]**

Scope and importance of Biochemistry in animal science. Cell structure and functions. Techniques of cell fractionation, Ultra-centrifugation and electron microscopy. Chemistry and biological significance of carbohydrates, lipids, proteins, nucleic acids, vitamins and hormones. Enzymes, chemistry, kinetics, mechanism of action and regulation. Metabolic inhibitors with special reference to antibiotics and insecticides. Sub-unit structure of macromolecular and supra-molecular systems. Chemistry of antigens and antibodies and molecular basis of immune reaction. Separation of macromolecules of biological significance, their isolation, purification, and characterization. Radioimmuno assay and other binding essays. Calorimetry, spectrophotometry, chromatography and electrophoresis, Isotopic methods.

Bioenergetics and biological oxidation; Digestion of food, its absorption and energy metabolism in ruminants and nonruminants. Metabolism of carbohydrates, lipids, amino acids and nucleic acids. Bio Synthesis of Proteins and nucleic acids. Regulations of gene expression Chemistry of respiration and gas transport. Water and electrolyte metabolism. Nutritional needs for maintenance, growth and production. Significance of calorie proteins and essential amino acids. Deficiency diseases, metabolic disorders and clinical biochemistry. Metabolism of specialised tissues. Connective tissue, nervous tissue, muscle, blood, cartilage and bone and mammary tissue; Endocrine glands, Biosynthesis of hormones and their mechanism of action.

Fundamental principles of human nutrition. Nutritional significance of animal products. Environmental factors like heat, cold, radiation and environmental pollutants.

Animal Biotechnology (Code: BTY)

Cell biology, Molecular Biology and Genetic Engineering-The structure of animal cell, organization of the cytoplasm, cell organization of the cytoplasm, cell organelles, endoplasmic reticulum, Golgi complex, mitochondria, lysosomes, nucleolus and sub-nuclear structures, molecular organization of cell membrane and transport across cell membrane, cell-division and cell cycle, control of proliferation, cell to cell signalling, cell receptors, cell transformation, characteristics of tumour cells, oncogenes and their proteins.

Packaging of DNA and eukaryotic chromosome, organization of genes on chromosome, pseudogenes, eukaryotic genome sequestered in organelles and organelles expressing their own genes, mitochondrial genome in mammals, mammalian satellite DNA, Mobile genetic element, tandem gene clusters, Promoters, RNA processing and RNA splicing.

Gene structure, organization of prokaryotic and eukaryotic genome nucleases, DNA replication, DNA repair and recombination, RNA biosynthesis, genetic code, ribosomes, mRNA, regulation and control of transcription.

Transcription initiation and termination in prokaryotes and eukaryotes, processing of rRNA and tRNA editing.

Purine and pyrimidine bases of nucleic acids, synthesis of nucleic acids, importance of nucleic acids and nucleoproteins. *In vitro* DNA synthesis, oligonucleotides, role of DNA ligases, DNA and RNA polymerases of eukaryotes and prokaryotes and their mode of action, regulatory proteins that affect RNA polymerase, functional promoters RNA replicase and polynucleotide kinase, reverse transcriptase; protein biosynthesis, ribosomes and the site of protein synthesis, RNA, amino acid activation for protein synthesis, regulation and control of translation and post translational modification.

Virus replication, description of major groups of DNA and RNA viruses, oncogenic viruses, animal viruses commonly used in molecular biology, recombination in bacteria, fungi and viruses, transformation, conjugation and transduction, molecular mechanism of spontaneous and induced mutations, site-directed mutagenesis.

Isolation and purification of DNA from prokaryotes and eukaryotes, DNA fingerprinting, RFLP, restriction enzymes, DNA cloning, cloning vectors, production of recombinant plasmids, construction of genomic and cDNA libraries, identification of specific clones, southern/northern blotting techniques, polymerase chain reaction, nucleic acid probes and nucleic acid hybridization, radioisotopes and their handling, recombinant DNA technology applications in animal health and production, biosafety, identification and isolation of important genes, gene transfer in eukaryotes, techniques of gene transfer.

Animal tissue culture and Hybridoma technology-Cell culture techniques, culture of different tissues and organs and its applications, maintenance and preservation of cell culture, nutritional requirements of cells, replica plating, *In situ* hybridization in cells and micro-manipulation.

Somatic cell hybrids in gene analysis of animal cells, theory of monoclonal antibody production, immunization of mice; myeloma cell lines and their maintenance, cryopreservation of clones, cell fusion, screening assays-ELISA, IFAT, RIA, subcloning, expansion of clones, *In vitro* and *in vivo* production of monoclonal antibodies, isotyping and binding of Mabs, application of Mabs in diagnostics.

Embryo transfer technology-Folliculogenesis, superovulation, hormonal control of ovulation, fertilization and embryo development, collection of embryos (surgical/non-surgical), embryo transfer, oocyte maturation *in vitro*, sperm capacitation, sperm-oocyte interaction, *in vitro* fertilization, *in vitro* and *in vivo* development of embryos; factors affecting embryo development *in vitro*, and embryo culture, embryo freezing, sexing, bisection and blastomere cloning of embryos, production of transgenic animals.

Biophysics and Bioprocess technology-General structure of proteins, enzymes and co-enzymes in protein function, membrane proteins, glycoproteins and glycolipids; physico-chemical characterization of proteins, classification of proteins and organization of peptides and proteins, conformation of polypeptides (protein) chain, protein folding; protein extraction from biological samples and their estimation, purification of proteins and electrophoretic analysis including western blotting. Structure and classification of amino acids, physico-chemical properties and analysis of amino acids; structure and functions of nucleic acids, structural and chemical features of various types of DNA and RNA, physico-chemical properties of DNA and RNA; microbial fermentation process, production of biomass, separation and purification methods, modification of specific products, continuous processing, immobilization methods for enzymes and cells, specific application of bioprocess technology in veterinary science.

Animal Genetics & Breeding [Code: AGB]

Overview of Genetics

History and development of genetics. Cell division and cell cycle; Chromosomal theory of inheritance. Cytoplasmic inheritance. Concept of gene. Mendelism and its deviation, Multiple alleles, gene interaction, linkage and crossing over. Penetrance and expressivity. Inheritance of sex linked, sex limited and sex influenced traits. Mutations, lethal genes; Gene modifiers. Sex determination and differentiation.

Population Genetics

Individual *versus* population. Gene and genotypic frequencies and factors affecting them: Hardy Weinberg equilibrium; Change in gene and genotypic frequencies due to systematic

processes (mutation, migration & selection) and dispersive processes Balance between mutation and selection. Idealized population, Effective population size. Inbreeding, Co-ancestry, regular system of inbreeding, Path coefficient. Inbreeding depression and Heterosis

Quantitative Genetics

Continuous variation. Values and means: population mean, average effect, breeding value, dominance deviation, interaction deviation. Variance and its components: additive and dominance variance, interaction variance, environmental variance. Genotype x environment interaction, Genetic slippage. Resemblance between relatives: Offspring and one parent, offspring and mid parent, half-sibs, full-sibs. Concepts of heritability, repeatability, phenotypic, genetic and environmental correlations; Methods of their estimation, uses, possible biases and precision of estimates. Threshold characters and estimation of their genetic parameters. Genetic assimilation. Response to selection and its prediction, selection differential and intensity of selection. Measurement of response and realized heritability. Selection differential and intensity of selection. Short term and long term selection: Asymmetry of selection response and selection limit.

Inheritance of economic characters in livestock including poultry and genetic improvement programmes

Economic traits and their inheritance in different livestock species and poultry, Genetic improvement programs of livestock and poultry in India. Different mating systems and their phenotypic and genetic consequences. Basis of Selection, Methods of selection. Different methods of sire evaluation. Prediction of breeding values of sires under various milk recording schemes. Genetic improvement programmes for growth, production, reproduction and diseases resistance of livestock and poultry. Genetic divergence, general and specific combining ability; recurrent and reciprocal recurrent selection. Breeding plans under different agro climatic zones of India and constraints in their implementation. Crossbreeding Programmes in India. Role of artificial insemination/ ONBS/ MOET technology in animal breeding. Bull Mother Farms.

Animal genetic resources and its conservation

Origin, history and utilization of Domestic animal diversity in India. Present status and flow of Animal Genetic Resources and its contribution to livelihood security. Methodology for characterization of livestock and poultry breeds through systematic surveys. Uniqueness of breeds, social, cultural and economic aspects of the owners/ communities rearing specific breeds. Genetic characterization, diversity analysis and evolutionary relationship among breeds/ species. Concept of conservation, in-situ and ex-situ conservation, models of conservation, priorities of breeds for conservations, National and International strategies for conservation of Animal Genetic Resources. Status, opportunities and challenges in conservation of AgNR. IPR issues pertaining to animal genetic resources. Registration of livestock breeds and protection of livestock owner's rights in India.

Molecular Genetics

Structure and properties of nucleic acids. Nucleic acid as genetic material. Central dogma, DNA replication/repair and recombination; genetic code; Transcription and translation in prokaryotes and eukaryotes; Genome organization, Regulation of gene expression, Genomic imprinting, rDNA technology, Molecular biology techniques and their application, Gene mapping: Genetic and physical, QTL mapping , DNA markers and their application, Marker Assisted selection, Marker Assisted Introgression, GWAS, Sequencing including Next Generation Sequencing, RNAi technologies and their application. Transgenesis.

Cytogenetics

Basic and fine structure of chromosome, Organization and types of chromosomes, Chromosomal profiles of various livestock species, Chromosomal aberrations, Karyotyping and chromosomal bandings (C, G, Q, R, NOR, High resolution), Chromosome painting, Artificial chromosome, Mosaicism and chimerism, In-situ hybridization techniques and their applications. Importance of cytogenetics in improvement of livestock species.

Immunogenetics

Immune response and genetic factors influencing the immune response to pathogens, Immune response (IR) genes (MHC and Non-MHC), Host-pathogen interactions and genetic basis of disease resistance.

Bioinformatics in Animal Genetics & Breeding

Definition; Scope of bioinformatics in Animal Genetics and Breeding. Concept of data base and computational biology. Biological database: definition, types and description. Introduction to NCBI: Literature, Entrez, nucleotide and genome specific resources; Data mining. Tools for sequence analysis, 3D structure and similarity. Different softwares pertaining to application of molecular biology in animal genetics and breeding.

Statistical methods in Animal Genetics and Breeding

Probability and distribution. Concept of univariate and multivariate models. Analysis of segregation - Detection and estimation of linkage for quantitative characters. Multiple correlation, Simple and multiple regression. Diallel and partial diallele crossing. Matrix algebra and their types. Basic concepts statistical inferences and balanced experimental design. Least squares ANOVA: Non-orthogonality of data, Least squares constant and data adjustment. Concept of Bayesian statistics and its application in Animal Genetics & Breeding. General linear models: fixed, random and mixed models. Generalized and weighted least squares, Estimation of fixed effects in one and two way classification with or without interactions. Estimation of variance components of random effects using least squares, maximum likelihood and restricted maximum likelihood methods. Concept of BLUP and BLUE, Different Henderson's Models, Softwares for estimation of variances. Nested and cross classification of data. Multivariate Techniques and their application: D^2 statistics, Fisher's discriminant function

Small Laboratory Animal Breeding

Breeding colonies of Mice, Rats, Hamster, Guinea Pigs and Rabbits. Selection and Mating Methods/system: Monogamous, polygamous and others. Development of genetically controlled laboratory animals: Rules for nomenclature, Inbred strains, Outbred stocks, Mutant stock, Recombinant Inbred strains, Transgenic strains. Gene targeting and production of gene knock out animals. Genetic control and monitoring, Record keeping. Ethics and legislations of Laboratory animal use

Animal Nutrition [Code: ANT]

General Nutrition: Carbohydrates, proteins and fats, their digestion and metabolism, Protein value of feed, measure of protein quality, application of protein quality in feeding practices and supplementary value of proteins; Intake and utilization of energy and nutrients of feeds. Essential fatty acids and their role in lipogenesis in relation to nutrition. Requirement of energy, protein, minerals (macro and micro). Vitamins and additives for poultry and pigs; protein-energy inter-relationship, comparative digestion of nutrients in various species.

Feeds and animals body composition; function of water in animal body; metabolism and utilization of nutrients (carbohydrates; fats; proteins, non-protein nitrogen, minerals and

vitamins); rumen digestion and metabolism; effect of different feeds on rumen microbial activity. Classification of bacteria and protozoa, influence of various factors effecting the microbial activity. Maintenance of continuous fermentation system and a consideration of its limitation. Factors affecting rumen development; non-protein nitrogen metabolism in the rumen. Animal feeds and fodders, quality of forage related to production, various schemes of partitioning carbohydrates; limitation of the Weende methods of forage analysis; detergent method of feed analysis; chemical and biological evaluation of feeds and forages including *in vitro* digestibility trials; study of animal energetics and basic description of animals relative to the requirements of energy and protein; role of antibiotics, hormones and other biostimulators; importance of trace minerals in ruminant nutrition and their relationship with vitamins and hormones.

Applied Nutrition-Feeding standards, their evolution and significance, feeding standards as hypothetical rations; feeding standards as indispensable guides, protein, vitamin and mineral supplements; translation of feeding standards in meal mixture specification, preparation of mixed mineral supplements; flexible formula for non-ruminant meal mixtures, creep rations for piglets, quality control of feedstuffs, ISI standard; feed cost of non-ruminant production; efficiency of non-ruminants for feed conversion into animal products.

Statistical design and evaluation of feeding trials; Nutrient requirement of cattle, buffaloes, sheep and goats at various stages of growth, production and reproduction; present feeding standards and their limitations; factors affecting the nutritional requirements of ruminants; nutrients and their metabolism with reference to production and composition of milk, meat and wool; Relation of feed value to its chemical composition; nutritional factors affecting the quality and quantity of milk, meat and wool; input-output relationship and feed conversion efficiency for different traits; methods and procedures used in formulating economically balanced rations, calf starters, efficiency of feed conversion into animal products; agro industrial by-products; their feeding value and incorporation in meal mixtures; supply and demand of animal feeds in the country.

Livestock Production & Management (Code: LPM)

General concept of livestock production and management in Indian agroclimatic and socio-economic conditions; Impact of livestock farming in Indian agriculture; Breeds, population and production statistics of various livestock species *i.e.* cattle, buffaloes, sheep, goats and pigs in India and their comparison with world statistic; various livestock development project programmes and their performance; role of livestock farming in poverty alleviation among rural poors.

Concepts of livestock housing under tropical and temperate climate adaptation and acclimatization; thermoregulation, heat tolerance of domestic animals; heat stress and summer management of livestock; types of animal housing; detail of loose housing for dairy cattle and buffaloes; space requirements for various categories of livestock in different housing systems.

Production and reproduction management of different species of livestock; lactation management; physiology of lactation and milk secretion; concept of machine milking in dairy cattle and buffaloes.

Labour requirement for different farm operations of various species of livestock farms; animal transportation and its regulations; knowledge of various livestock farm equipment and their maintenance.

Livestock behaviour and performance; application of knowledge of livestock behaviour for the effective management of various species of livestock; concept of livestock behaviours and welfare measures; classification of livestock behaviours.

Specific management practices for various species of livestock; rearing young and growing stock; management of milch, dry and pregnant stock; management of breeding stock; concept of mixed farming.

Feeding management of various livestock species; health care and management of livestock; preventive measures to be taken in livestock farms.

Importance of bullock power in Indian agriculture; bio-gas production; utilization and waste management of livestock farms; livestock insurance; livestock project planning and financing; role of cooperatives for livestock development.

Livestock Products Technology [Code: LPT]

Composition: Meat, milk, fish, poultry and eggs; Technology of processing and preservation of livestock products; methods and equipment; Methods of processing and storage of meat and meat products, milk and milk products, eggs and poultry meat; Industrial food preservation, refrigeration, freezing, freeze drying, dehydration, canning, radiopasteurization, chemical: additives, curing, smoking, cooking of meat products. Nutritional, chemical organoleptic and microbiological quality of animal foods; Evaluation and maintenance of quality and wholesomeness; Factors affecting quality of foods. Postmortem aspect of muscle as meat: Ageing of meat; histological and chemical changes; Tenderization and other uses of proteolytic enzymes; Production of protein hydrolysate and other processed foods. New product developments.

Processing and utilization of various animal by-products. Slaughter-house offal, methods of utilization, blood hides and skins, bones, horns and hooves, wool, hair and feathers, glands casings and other minor by-products; Animal by-product plant, planning, sanitation methods of operation. Marketing, Livestock production and supply characteristics; meat consumption and related demands; types of markets and trends in marketing livestock products and by-products; wholesale retail, future trends; consumer education and awareness, Grades and grading and quality control; regulatory and inspection measures, I.S.I. standards. Corporate bodies in regulating markets, marketing boards, internal trade and development of international market for livestock products; Economics of production; processing, preservation and distribution.

Origin and source of animal foods, Lay out construction, designing, organization, maintenance and management of abattoirs, Preslaughter care and slaughtering techniques for different kinds of meat animals and birds. Emergency slaughter; Elements of meat hygiene; Ante-mortem and postmortem inspection; condemnation and destruction of unit material; Physical and chemical characteristics of meat tissue and principal organs. Facilities relating to sanitation in plant operation. Adulteration and misrepresentation of meat; Biochemical and deteriorative changes in meat, State municipal and other regulations pertaining to meat trade, Bacterial, parasitic and other meat borne infections and infestations; Spoilage of meat and meat products, Regulation and implication of chemical additives used in meat, Sanitary standards for meat packing plants and meat stalls. Labeling and inspection of processed meat, foods; Meat products order.

Poultry Science [Code: PSC]

Genetics and Breeding-Breeds and breed characteristics; Mendelian traits in poultry-Its inheritance and usefulness; Economically important poultry inheritance; Gene action influencing them. Population genetics and path coefficients affecting such traits; heritability and Genetic correlations-their computation and application; Selection-natural, artificial, directive, disruptive, stabilizing individual, size and dam family, sib selection, progeny testing, combined selections; Construction of selection indices utilizing various economics traits', Restricted selection indices; Closed flock selection versus inner-population selection, recurrent and reciprocal recurrent

selection in poultry; part record versus full record selection response to selection plateau; Control population-its necessity and formation; Mating systems and their comparative efficiency in realizing response to selection; Inbreeding-its concept, measurement and effects; Development; evaluation and maintenance of inbred lines in poultry; Diallel crosses; Estimation of general and specific combining abilities, material effects; sex linked effects and heterosis.

Genotype or environment interactions: poultry; industry in India-its segment-Commercial hybridization; evaluation of test crosses; Random Sample test, practical breeding programme for broilers and layers; Dwarf gene and its usefulness in broiler and laying hen breeding. Selection for disease resistance; Blood groups; Biochemical polymorphism and their usefulness in poultry; Behavioural genetics-its importance.

Avian Nutrition-Carbohydrates, fats, proteins, nucleic acids-classification and properties, vitamins and minerals, properties, functions, deficiency state, source, requirements, feed additives-properties and functions.

Energy-Partition, Systems determination, evaluation of different system, heat increment, Metabolizable energy- utilization for growth and egg production, responses to energy restriction by growing chicken and layers; Proteins-Essential and critical aminoacids, inter-relationship among aminoacids, responses to lysine, methionine (+cystine) restriction by growing chicken and layers; Proteins-evaluation of quality by chemical, enzymatic, microbial and biological methods. Nutrient requirement-Methods of expression, factors affecting varying feed intake and nutrient intake, factors varying the nutrient requirement. Various standards for nutrient requirements.

Feeds-Sources of energy and nutrients; toxic constituents of feeds and methods of detoxification, supplementary value of food proteins, agroindustrial by-products, forest wastes and animal by products; Feeds formulation-Principles and methods; feed formulation for different classes of poultry, high energy feeds, nutrition of breeders, nutrition of caged birds, practical limitations, least cost poultry diets; Feeding systems-Methods; evaluation of different methods of feeding chicken.

Avian Physiology-Digestion, metabolism of carbohydrates; fats proteins; physiology of growth; Female reproduction, egg formation and factors influencing egg formation and production. Male reproduction and factors influencing fertility, Embryonic development; Role of endocrine glands; Respiration; regulation of body temperature; Physiological changes due to stress. Climatic factors and its influence on birds.

Avian Products Technology-Commercial egg and meat production; Egg structure and chemical composition; Grading of eggs and ISI standards; Internal quality of egg components and their nutritive value; Poultry dressing plants; steps in dressing and processing of chicken; Dressing yields; Cold storage of eggs; egg products; meat and meat products; Evaluation of meat quality-Physical, chemical and organoleptic; Utilization of poultry processing waste; feathers, offals, shanks etc., Different products of egg and meat; Preparation of egg powder and its utility. Microbial spoilage and methods of preservation of egg and meat; Methods of packing, transportation and marketing of eggs and meat.

Avian Health-signs of disease outbreak and procedures for early diagnosis; principles of disease control *viz.* vaccination schedules; treatments; Sanitary and quarantine measures, other precautionary methods during outbreaks; Carcass disposal; Important Bacterial diseases *Viz.* Pullorum Disease, Fowl Typhoid and Paratyphoid, Fowl Cholera, Infectious Coryza, Chronic respiratory disease, Spirochaetosis, Ulcerative enteritis; Important Viral diseases, *Viz.* Ranikhet disease, Infectious bronchitis, Infectious Laryngotracheitis, Fowl Pox, Marek's disease, Avian Leucosis complex, Infectious bursal disease, Avian Encephalomyelitis, Systematic fungal diseases, *viz.* Aspergillosis (Alfatoxicosis, brooder pneumonia), Thrush (candidiasis). Common

parasitic diseases *viz.* Round worms, Tape worms, External parasites *viz.* ticks, lice, fleas and mite. Protozoan diseases *viz.* Coccidiosis, Enterohepatitis and blood protozoan parasites. Disease syndromes *viz.* egg drop syndrome, fatty liver syndrome, Stress factors.

Incubation and Hatching- Principles of incubation, collection and storage of fertile eggs; factors influencing fertility and hatchability; Hatchery, sanitation and maintenance, Utilization and disposal of hatchery wastes; Pre-requisites of good hatchery, layout and equipment required; Housing-Location and site selection-Ideal layout of poultry houses for different systems of rearing, Controlled environment and open-sided houses: Types of material used for construction taking into consideration availability and different climatic conditions; Role of cross ventilation and effect of air pollutants and obnoxious gases in poultry houses.

Brooding and Rearing: Principles and methods of brooding, Space requirement for housing, feeding and watering. Free range and confinement systems of rearing, cage versus floor and salt systems, advantages and disadvantages; Staking densities their effect on production: Types of cage for starters; grooves and layers; Effect of artificial light on material and egg formation and production; Types of litter and their characteristics; Litter management and their subsequent utility.

Poultry Housing Equipment-Types of brooders; Feeders, waterers laying nests; chick guards, crates, catching hooks, perches etc.

Common Management Problems: Cage layer fatigue, Fatty liver syndrome, Flightiness, Hysteria, Egg eating, cannibalism, Rodent and fly problems. Wet litter and ammonia, dust and air pollutants in the sheds; Replacement of stock, Forced molting. Methods and programmes of molting, culling of layers.

Farm Economics- Production cost of eggs, Chicken, pullets and broiler, Feasibility reports for setting up small and large layer and broiler units. Poultry industry in India, its growth and futurology.

Veterinary Microbiology [Code: VMC]

Classification and nomenclature of bacteria. Structure, function and chemistry of bacterial nuclear apparatus. Cytoplasm, Intracellular granules, Cell wall, Cytoplasmic membrane, Mesosomes, Capsule, Flagella, Fimbriae, Endospore, Protoplasts, Spheroplasts, L-forms, Involution forms. Bacterial stains, staining and microscopy. Growth and nutritional requirements of bacteria. Respiration in bacteria. Reproduction and growth phase of bacteria. Effects of chemical and physical agents and antibiotics. Bacterial variations including transduction, transformation and conjugation.

Systematic study of bacteria belonging to genera *Borrelia*, *Leptospira*, *Campylobacter*, *Pseudomonas*, *Brucella*, *Bordetella*, *Escherichia*, *Citrobacter*, *Salmonella*, *Shigella*, *Klebsiella*, *Enterobacter*, *Proteus*, *Vibrio*, *Haemophilus*, *Staphylococcus*, *Streptococcus*, *Bacillus*, *Clostridium*, *Listeria*, *Erysipelothrix*, *Corynebacterium*, *Nocardia*, *Rickettsia*, *Chlamydia*, *Mycoplasma*, *Rhodococcus*, *Mycobacterium* and *Neisseria*.

General characteristics of fungi. Classification and study of pathogenic fungi- *Epidermophyton*, *Microsporum*, *Trichophyton*, *Cryptococcus*, *Aspergillus*, *Blastomyces*, *Coccidioides*, *Histoplasma*, *Candida*, *Rhizopus*, *Contaminating fungi*, *Rhizopus*, *Mucor* and *Penicillium*. Fungi causing mastitis, abortion and mycotoxicosis.

Classification and nomenclature of viruses, The nature of viruses, virus replication, Pathogenesis of Viral Infections and Diseases, Antiviral Immunity, Laboratory Diagnosis of Viral Infections, Epidemiology and Control of Viral Diseases.

Veterinary and Zoonotic Viruses: Poxviridae, Asfarviridae and Iridoviridae, Herpesvirales, Adenoviridae, Papillomaviridae, Polyomaviridae, Parvoviridae, Circoviridae, Anelloviridae, Retroviridae, Reoviridae, Birnaviridae, Picobirnaviridae, Paramyxoviridae, Pneumoviridae, Rhabdoviridae, Filoviridae, Bornaviridae, Orthomyxoviridae, Bunyaviridae, Arenaviridae, Coronaviridae, Arteriviridae, Roniviridae, Picornaviridae, Caliciviridae, Astroviridae, Togaviridae, Flaviviridae, Hepeviridae, Hepadnaviridae, Nodaviridae, Deltaviruses, Unclassified Viruses, and Prions.

Host-parasite relationships. Antigens. Types of antigens. Properties and specificity of antigens. Factor determining antigenicity. Haptens and carriers. Heterophile antigens. Immunoglobulins– their classes and sub-classes, structure and function. Allotypes. Idiotypes. Genes coding for Igs. Generation of diversity. Monoclonal antibodies. Purification of antibodies. Theories of antibody formation. Lymphoid organs: primary, secondary and circulation of lymphocytes, cells involved in the immune response– B lymphocytes, T lymphocytes, subsets and nature of receptors. Macrophages, Dendritic reticular cells, Langerhan's cells. Cellular interactions Cell-mediated immune responses. Mechanism of interaction of antigen and antibody. The complement system. Classical and alternate pathways. Serological reactions: agglutination, precipitation, neutralization, CFT, FAT, ELISA,RIA, Western blot tests methods as an aid to diagnosis, blotting techniques like Northern, Western blotting, Major, Histocompatibility complex: organization. Nature of antigens and MHC restriction. Hypersensitivity–immediate and delayed types, and its mechanism. Mechanism of autoimmunity and immunological tolerance.

Veterinary Extension Education [Code: EXT]

Extension education, objectives and principles; Formal and informal extension education; Growth of extension education as a discipline and profession; Extension education in relation to agricultural development: (including Animal Husbandry), Genesis of agricultural development/ rural development programmes in India- leading to the concepts of reorganized extension services and integrated rural development programme. Role of extension education in development programme; Comparative studies of extension education system in selected developed and developing countries.

Extension teaching methods and audio-visual aids. Teaching and learning processes in extension education; Extension teaching methods and audio-visual aids and their classification; Selection and use of extension methods and audio-visual aids; Effective combination of extension teaching methods; Audio-visual aids and their role in transfer of technology; Social psychological considerations in use of audio-visual aids; Combining and using audio-visual aids for effective teaching, Production of low cost audio-visual aids.

Programme planning in extension education. Principles and processes; planning process; Methods of identifying needs; Securing participation and bringing co-ordination in programme planning process; Importance of Five Year Plan in India; Agricultural and Animal Husbandry Development programmes in action. National demonstrations. Operational research project, and lab to land programme, Evaluation as an integral part of programming.

Extension administration. Nature and characteristics; Extension administration versus general administration; Genesis of agricultural administration with special reference to extension service in India; Principle and theories of administration; Role and function of extension administrations; Factors affecting the extension administration, Organizational set-up for extension services in India including the Training and Visit system at different levels.

Training of extension personnel and farmers. Principles and importance of extension training. Types of training programmes for extension personnel and farmers; Emerging patterns

and models of extension training; Factors affecting extension training, Efficacy of training, T & V system its merits and demerits. Methods of identifying training needs. Small group techniques in training. Assessing training effectiveness; Training facilities available in India for different extension personnel and farmers.

Concepts features and designs of various programmes in India, Integrated Rural Development (IRD), T&V system of Extension, Drought Prone Area Programme (DPAP), Small Farmers Development Agencies (SFDA), National Rural Employment Programme (NREP); Extension Programme for Rural Women; Training of Rural Youth for Self employment (TRYSEM); Lab to land Programme (LLP), National Demonstration (ND: Krishi Vigyan Kendras (KVKs); Operational Research Project (ORP) and Farmers Training Centre (FTC)".

Basic rural Institutions engaged in rural development. Structure and function of rural institutions and process of activating them; Factors influencing their involvements in rural development; Concept and theories of leadership, Identification and training of local leaders, Basic patterns of leader-group relationship in rural society; Role and importance of local leaders in rural development. Rural sociology and social psychology- their scope and importance in extension work. Concept of human society; characteristics of rural people; Scientific study of human behaviour, Socio-psychological factors in transfer of technology, Theory and principles of social structure; Social interactions and processes; Process of socialization Values and norms of rural social system; resulting socio-psychological changes in rural society.

Diffusion and adoption of innovation. Models and theories of diffusion and adoption; Process of diffusion and adoption, Adoption process and sources of information; Adoption curve-adoptors categories and their characteristics; Factors associated with adoption and rate of adoption; Role of adoption in relation to attributes of innovations; Role of change agents in adoption and diffusion; consequences of adoption of innovations.

Process and media of communication: Models and theories of communication; Nature and importance of communication; Communication process and elements of communication; Fidelity in communication and factors affecting it; Role of mass media in transfer of technology; Effective media-mix for rural audience; Problems and barriers in communication.

Research and evaluation in extension programmes: Social research and evaluation in extension programmes; Process of scientific research-various designs; Measurement, levels of measurements and corresponding statistical techniques; validity and reliability of measuring devices; Methods of observation and data collection; Techniques of tabulation; analysis of data and report writing; Importance of research and evaluation in extension programmes.

Veterinary Gynaecology & Obstetrics [Code: VGO]

Gynaecology-Functional anatomy of female reproduction-Anatomy and pre-natal and post-natal development of the reproductive organs of female farm animals and their specific sexual functions. Functional histology of the female reproductive organs; Physiology of Reproduction-Endocrinology of reproduction in females; Hypophysial hormones, Gonadal Steroid hormones, and placental hormones; their chemical structures, functions and mechanism of actions. Prostaglandins and synthetic hormones, hormonal interrelationships; Neuroendocrinology of reproduction-Hypothalamus, neurohypo-physis and pineal gland, Reproductive life cycles-Foetal and neonatal life; puberty, adult sexuality, aging and fertility; Folliculogenesis-egg maturation and Ovulation; Transport and survival of gametes sperm transport in the female reproductive tract, ova pickup and their transport in the oviduct; gamet transport and conception rate; fertilizable life and ageing of egg. Transuterine migration and loss of eggs; Embryonic development in oviduct; Fertilization, Cleavage and implantation; Gestation, Maternal physiology in pregnancy, prenatal physiology and parturition; Anatomy of the udder, mammary growth and lactation, sexual maternal and neonatal behaviour.

Reproductive cycles-Reproductive cycles in cattle, buffaloes, sheep, goats, swine and horses. Puberty, Oestrus Ovulation and Oestrus Cycles, Breeding and conception, Gestation, parturition, The post-partum period and Reproduction efficiency.

Reproductive failure-Reproductive failure in female farm animal, ovarian dysfunction, disorders of fertilizations, prenatal mortality, perinatal and neonatal mortality, disorders of gestation, parturition and lactation; sexual health control; diagnosis, prevention and control of different reproductive disorders.

Techniques for improving reproduction efficiency- Artificial insemination of the female; Induction and synchronization of ovulation-Control of ovulation; Clinical methods of inducing ovulation in different farm animals; Synchronization of ovulation; pregnancy diagnosis. Laboratory methods-Pregnancy diagnosis in cow, mare, ewe and sow; Embryo Transfer-Superovulation, collection of ova, selection of ova for transfer. Transfer of Ova, Synchronization of oestrous between donor and recipient-Composition of media for embryos; Storage of embryos-maintenance of pregnancy after embryo *in-vitro* maturation of oocytes, *in-vitro* fertilization-potential uses and limitation of embryo transfer and related techniques.

Obstetrics-Obstetrical Anatomy-Diseases and Accidents during the Gestation Period, Abortion in Cattle, Horses, Swine, Sheep and Goats; Mumification of the Fetus, Fetal Maceration; Prevention of Conception and induction of Abortion; Extra- uterine pregnancies and fetuses; Dropsy of the fetal membranes and abdominal hernias resulting in hysterocael; Torsion of the uterus.

Vagino-cervical prolapse; Paraplagia of pregnancy, Miscellaneous accidents during pregnancy; Parturition-Normal parturition; Artificial interferences in normal parturition; Diseases and care of the newborn, care of the postpartum dam; Dystokia-Cause of dystokia; Diagnosis of various types of dystokia, obstetrical operations for relieving dystokia, Injuries and diseases of the puerperal period; infertility-infertility in the cow; Infectious diseases, Miscellaneous Infestation of the bovine female genital tract; Hormonal disturbances resulting in Infertility; causes; Pathological causes.

The "Repeat Breeder" cow. Management problems-Infertility in the mare, sow, ewe and doe.

Andrology, Seminology and Artificial insemination; Andrology and Seminology-Functional anatomy of reproduction in male farm animal; Endocrinology and neuroendocrinology of male reproduction; Mechanisms of action of gonadotrophins, Puberty and sexual maturity; Spermatogenesis; Factors affecting spermatogenesis; Passage of sperm through the excurrent ducts; Function of epididymis; Semen and its various components; Metabolism of semen; Sexual behaviour-endocrine and neural mechanisms of sexual behaviour; factors affecting sexual behaviour; contribution of gonads and accessory sex glands to semen ejaculate; survival of sperm *in vivo*, *in vitro* and the female reproductive tract; fertilizable life of sperm; hereditary, congenital and acquired factors leading to infertility, abnormalities of sperm; Bacteriological aspects of semen and diseases transmissible through semen; sexual health control, diagnosis, treatment and prevention of different types of infertility.

Artificial Insemination-Advantages and limitations; sterilization of artificial insemination equipments; methods of collection of semen; evaluation of semen; principles of sperm preservation; extension of unfrozen semen and extenders used for the same; principles and techniques of freezing of spermatozoa, Storage and transportation of semen; Insemination Techniques; dose, time and site of insemination; conception rates; measures of reproductive efficiency; management and training of males for use in artificial insemination.

Veterinary Medicine [Code: VMD]

Clinical Examination of Patient: General clinical examination, anamnesis and determining the present status, general examination with regard to signalment of the patient, habitus, skin, conjunctiva, temperature. Special examination of the cardiovascular, respiratory, digestive, urino-genital, nervous, muscular and lymphatic systems. Special examination with regard to locomotion, allergic and serological tests, examination of blood, urine, faeces and special diagnostic procedures like passage of stomach tube, catheters, exploratory puncture, rectal examination, use of ophthalmoscope and radiological examination.

Diseases of digestive system and peritoneum: stomatitis, parotitis, pharyngitis, paralysis of pharynx, paralysis of oesophagus, obstruction of oesophagus, oesophagitis, dilation of oesophagus, vomiting, impaction of rumen and tympany, traumatic reticulitis, impaction of omasum, omasitis, abomasitis, displacement of abomasum, indigestion in ruminants, constipation, Gastritis, enteritis, obstruction of intestines, diarrhea, dysentery and colic in equines. Peritonitis, ascites, volvulus, intussusception.

Diseases of liver and pancreas: Jaundice, hepatitis, cirrhosis, hepatic abscess, pancreatitis.

Respiratory system: Rhinitis, epistaxis, laryngitis, tracheitis bronchitis, pulmonary emphysema, pulmonary oedema, pneumonia, pleurisy, hydrothorax, and pneumothorax.

Circulatory system: pericarditis, myocarditis, endocarditis, hypertrophy of heart, dilatation of heart, heart failure, bradycardia, tachycardia, Diseases of the blood vessels,

Diseases of the Blood and Blood forming organs: Dehydration, haemorrhage, shock, oedema, anaemia, leukaemia, leucopaenia and abnormalities of acid base balance. Diseases of the spleen and lymphnodes.

Urino-genital system; Albuminuria, chronic haematuria in cattle, nephritis pyelonephritis, cystitis, urolithiasis, retention of urine, paralysis of urinary bladder, urethritis and prostatitis.

Skin and Muscular system: Pruritis, urticaria, pityriasis, eczema, dermatitis, dematophytosis, dematosis, keratosis, hyper keratosis, para keratosis, erythema, psoriasis, pyoderma, acanthosis, dermatomycosis, elephantiasis, alopecia, ecthyma, acne, impetigo, seborrhoea, myositis, muscular atrophy and muscular dystrophy.

Nervous system: Meningitis, encephalitis, sunstroke, heat stroke, lightning stroke, vertigo, epilepsy, eclampsia, chorea, spinal meningitis, neuritis.

Ocular diseases: Conjunctivitis, Keratitis, iritis, cataract, iridocyclitis glaucoma, corneal opacity, iriditis, amaurosis, retinitis, uvetis.

Diseases of ear: Otitis externa, otitis media, otitis interna, otorrhoea, labyronthitis, perforated drum, tympanitis.

Veterinary Jurisprudence: Legal duties of veterinarian, examination of animals for soundness, examination of injuries, postmortem examination, causes of sudden death in animals, collection and dispatch of material for chemical analysis, detection of frauds, evidence procedure in court, legal enactment in I.P.C. relating to animals, provincial and central acts relating to livestock, code of conduct and ethics of veterinarians.

Common infectious diseases of livestock: Mastitis, Colibacillosis, Tetanus, Enterotoxaemia, B.Q., H.S., Prateruberculosis, Tuberculosis, Brucellosis, Leptospirosis, Swine erysipelas, Listeriosis, Glanders, CCP, CBPP, Tyzzer's disease, Coccidiosis in rabbit, Parasitic gastro enteritis, Fascioliasis, Amphistomiasis, Schistosomiasis, Filariasis, Gid, Trypanosomiasis, Babesiosis, Thilerosis, mange and mites. FMD, Ephimeral fever, PPR, IBR, Rabies, ICH, CD, Parvo,

Contagious ecthyma, Swine fever, Blue Tongue, Infectious equine anaemia, Equine viral arteritis, Anaplasmosis, Ehrlichiosis, Rocky mountain spotted fever, Q-fever.

Production and deficiency disease of farm animals: Parturient paresis, Downers cow syndrome, Eclampsia, Hypomagnesaemia tetany, PPH, Azoturia, Ketosis, Diabetes, Hypo and hyperthyroidism, Deficiency diseases of vitamins and minerals.

Endocrinological disorders.

Chemical poisons and bio toxicants: Lead, Mercury, Arsenic, Selenium, Fluoride, Nitrate and nitrite, Organ phosphorus and chlorinated hydrocarbons. Snake bite, Lantana poisoning, Bracken fern poisoning.

Special Therapeutic Approaches: Veterinary fluid therapy with fluid, electrolyte, plasma expanders, packed cell transfusions, etc. Clinical assessment of their requirement and doses. Blood transfusion with blood groups in animals-their therapeutic significance. Blood matching methods. Oxygen therapy.

Poultry Disease: Etiology, epidemiology, pathogenesis, clinical manifestations, diagnosis, treatment and control of the following diseases of poultry: Newcastle disease, IBD, ILT, mycoplasmosis, coccidiosis, salmonellosis, necrotic enteritis, malabsorption. leucosis. Marek' disease, mycotoxicosis, avian encephalomyelitis.

Veterinary Parasitology [Code: VPA]

General classification, morphology, life cycle, epidemiology, pathogenesis, clinical signs, diagnosis, treatment and control, economic and zoonotic importance, immunity, anthelmintic resistance, host-parasites relationship, types and grades of immunity, antigenic characters of helminths, cellular and humoral factors in immunity to helminths, self cure phenomenon, larva migrans, hypersensitivity reactions, immunodiagnosis, advances in vaccine development and mechanism of host resistance against trematodes, cestodes and nematodes belonging to the following families.

Trematodes (Platyhelminthes)- Dicrocoeliidae, Opisthorchiidae, Fasciolidae, Echinostomatidae, Heterophyidae, Plagiorchiidae, Troglotrematidae, Notocotylidae, Paramphistomatidae, Schistosomatidae, Paragonimidae, Prosthogonimidae, Clinostomatidae, Deplostomidae.

Cestodes (Platyhelminthes)- Anoplocephalidae, Thysanosomidae, Dilepididae, Dipylidiidae, Hymenolepididae, Davaineidae, Taeniidae, Mesocestoididae, Diphyllbothriidae.

Nematodes (Nemathelminthes)- Anisakidae, Ascarididae, Oxyuridae, Heterakidae, Rhaditidae, Strongyloididae, Strongylidae, Trichonematidae, Stephanuridae, Syngamidae, Ancylostomatidae, Amidostomidae, Trichostrongylidae, Ollulanidae, Dictyocaulidae, Metastrongylidae, Protostrongylidae, Filaroididae, Spiruridae, Thelaziidae, Acuariidae, Tetrameridae, Physalopteridae, Gnathostomatidae, Filariidae, Setariidae, Onchocercidae, Dracunculidae, Trichinellidae, Trichuridae, Capillariidae, Dioctophymidae.

Acanthocephala- Polymorphidae, Oligacanthorhynchidae.

General classification, morphology, life cycle, epidemiology, pathogenesis, clinical signs, diagnosis, chemotherapy, control, economic and zoonotic importance, immunity, immune evasion mechanism, premunity, sterile immunity, hypersensitivity reactions, immunodiagnosis and advances in vaccine development against following protozoan parasites of animals:

Trypanosomatidae (*Trypanosoma*, *Leishmania*), Trichomanadidae (*Tritrichomonas*, *Trichomonas*), Monocercomonadidae (*Histomonas*), Hexamitidae (*Hexamita*, *Giardia*), Endamoebidae (*Entamoeba*), Eimeriidae (*Eimeria*, *Isospora*), Cryptosporidiidae (*Cryptosporidium*), Sarcocystidae

(*Sarcocystis*, *Toxoplasma*, *Neospora*), Plasmodiidae (*Plasmodium*, *Haemoproteus*, *Leucocytozoon*), Babesiidae (*Babesia*), Theileriidae (*Theileria*), Haemogregarinidae (*Hepatozoon*), Balantidiidae (*Balantidium*).

Classification of arthropods with special reference to insects and acarines of medical and veterinary importance, morphology, life cycle, bionomics, pathogenicity, control of parasitic arthropods and vectors, physical, chemical and biological insecticides and their application; toxicology and antidotes of important insecticides; acaricide resistance, principles of integrated control of the genera and species responsible for injury and disease transmission to livestock in the following groups:

Insecta- Siphunculata, Mallophaga, Hemiptera, Coleoptera, Siphonaptera, Diptera (Ceratopogonidae, Simuliidae, Psychodidae, Culicidae, Tabanidae, Gasterophilidae, Muscidae, Glossinidae, Calliphoridae, Oestridae, Hippoboscidae).

Acarina-Ixodoidea (Argasidae, Ixodidae); Mesostigmata (Dermanyssidae) Trombidiformes (Trombiculidae, Demodicidae, Cheyletidae, Myobiidae), Sarcoptiformes (Sarcoptidae, Cytoditidae).

Pentastomida-Porocephalidae (*Porocephalus*), Linguatulidae (*Linguatula*).

Veterinary Pathology [Code: VPL]

Etiology of diseases and concept of multiple-factor etiology; Predisposing factors of disease; Extrinsic or environmental factors in relation to soil, air, humidity and temperature; Susceptibility and resistance to disease; Intrinsic factors *e.g.* species, age, sex heredity, Physical agents; Mechanical Injuries, heat, cold, decreased atmospheric pressure, injuries due to light *e.g.* photosensitization, injuries due to electricity; Chemical agents as causes of disease, Poisoning caused by Exogenous and Endogenous poisons; Microorganisms and animal parasites; Bacteria, fungi and viruses; protozoa, platyhelminthes and nemathelminthes.

Inflammation-Macroscopic and microscopic observations, chemical mediators of increased vascular permeability; Chemotaxis and phagocytosis; Adhesions and emigration of leucocytes, sequence of cellular reaction; Formation of abscesses, Defence mechanism and reticulo-endothelial system; chronic inflammation; non-suppurative and suppurative granulomatous reactions; Reaction of blood to injury-Reaction of the plasma; Blood coagulation and retraction of clot, cellular reaction; Haemostasis and thrombosis and subsequent changes in thrombi. Effects of thrombosis and embolism. Haemorrhage and shock; Oedema-Tissue fluid formation, lymphatic drainage; general fluid balance; Inflammatory oedema, oedema of venous and lymphatic obstruction, cardiac and pulmonary oedema; Fever-Causes of fever, fever producing substances; functions of fever; Degenerative changes and their consequences-Degenerations and infiltrations; Cloudy swelling and hydropic degeneration; fatty changes; glycogenic infiltration; amyloid infiltration; hyaline degeneration; Necrosis, classification and autolysis; Gangrene.

Healing-Microscopical changes of healing tissue; Healing of wounds by first intention; formation of granulation tissue; Healing by second intention; Factors influencing wound healing; Control of healing process, local and general factors influencing healing; Healing of some special tissues; Mucous membranes, liver, kidneys and urinary passages, respiratory tissue, cartilage, bone, muscle, nervous tissue; Atherosclerosis- Morphology of atherosclerosis, Pathogenesis of the lesions, Chemical constituents of normal and diseased arteries, reactions of intima to injury; the organization of surface deposits; Pathological consequences of chromosomal abnormality-Pathological effects of radiation of higher animals-Acute effects of radiation, histological changes in haemopoietic and lymphoid tissues. Late effects of total radiation; Ageing, leukaemia, carcinogenic effects; Host-parasite relationship. Germ theory of disease, and the relationship

between host and parasite; factors determining invasion; barriers to invasion; Types of infection- Pathological features of mycotic, bacterial and viral infections; pathology of infections due to protozoa, platyhelminthes and nemathelminthes; Immunopathology, Hypersensitivity reactions- Anaphylaxis, cytotoxic antibody reactions, immune complex, Arthus type reaction, delayed hypersensitivity; Hypersensitivity to drugs and chemicals; Auto-immune type hypersensitivity reactions; Rejection of transplanted tissues; Immunological deficiency States; Pathology of nutritional diseases-Protein deficiency; carbohydrate deficiency; mineral deficiency; vitamin deficiency; Growth and its disorders-Metaplasia; atrophy; hypertrophy; hyperplasia, Nature of tumours, growth-Growth etiology, classification, morphology and behaviour of tumours; Benign and malignant tumours in domestic animals, their pathological features and diagnosis.

Functional disturbances, malformations, degeneration, circulatory disturbances, inflammation and pathogenesis of the cardio-vascular system. Pathology of haemic and lymphatic system, anaemia; Lymphangitis and lymphadenitis. Circulatory disturbances and inflammation of different parts of the respiratory systems; Aetiology, pathogenesis, classification of specific pneumonia and pneumoconiosis. Circulatory disturbances and inflammation of different parts of digestive system; congenital abnormalities of intestines; Disturbances of circulation and pigmentation, degeneration, necrosis and cirrhosis of liver; Degeneration and inflammation of different parts of the urinary system; disturbances of growth and inflammation of various parts of genital system including mammary gland. Disturbances of circulation, growth and inflammation of bone and skeletal muscles. Inflammation of meninges, brain and spinal cord. Pathology of the endocrine glands, special sense organs and skin and its appendages. Pathology of bacterial diseases, mycotic infections, viral diseases, PPLO and rickettsial infections, and parasitic diseases.

Veterinary Pharmacology [Code: VPT]

General Pharmacology: Development and scope of pharmacology, sources and nature of drugs, pharmacopoeia and drugs compendia, pharmacokinetics (absorption, distribution, biotransformation and excretion), principles of drug action (factors modifying drug action, physicochemical basis of drug action, drug receptor interaction, types and sites of drug action etc.) and pharmaco-metrics (Principles of bioassay and pharmacological evaluation of different types of drugs, determination of LD50, ED50, organization of screening and drug development).

Drugs Acting on Central Nervous System: General anaesthetics, hypnotics, sedatives, anti-convulsants, tranquilizers and other drugs affecting behaviour, (including antipyretics and anti-inflammatory drugs) and CNS stimulants including analeptics.

Drugs Acting on Peripheral Nervous System, Adrenergics, anti-adrenergics, Cholinergics, anti-cholinergics, drugs acting on ganglia, muscle relaxants (Including central muscle relaxants) and local anaesthetics.)

Drugs acting on Cardiovascular and Respiratory Systems, Drugs acting on heart, blood vessels, blood pressure, blood (coagulants and anticoagulants) and haemopoietic system. Expectorants, anti-tussives and bronchodilators.

Drugs Acting on Digestive System, Stomachics, antacids, carminatives and antizymotics, emetics and antimitics, cathartics, intestinal astringents, and drugs acting on liver, Pharmacology of rumen.

Drugs acting on Endocrine and Reproductive Systems: Pituitary hormones, thyroid hormone, and antithyroid drugs, parathyroid extract, insulin and other antidiabetic drugs, adrenal corticoids and sex hormones, Drugs acting on uterus and drugs used for fertility and contraception.

Drugs Affecting Body Fluids and Electrolytes; Drugs altering fluid balance, Diuretics, antidiuretics, Pharmacology of electrolytes and fluid therapy.

Autacoids: Histamine and antihistaminics, Serotonin, Polypeptides and prostaglandins.

General Chemotherapy: Historical development of chemotherapy, General principles of chemotherapy-selection of antimicrobial agents, combination therapy, mechanism and problem of drug resistance, misuse of chemotherapeutic agents and public health problem. Drug allergy and hypersensitivity.

Pharmacology, Pharmacokinetics and Toxicity of the following groups of chemotherapeutic agents:

- (a) Sulfonamides: Gut-acting and systematic sulfonamides, Long- acting sulfonamides, Pharmacotherapy with sulfonamides.
- (b) Antibiotics: Natural and semisynthetic penicillins; Streptomycin and other aminoglycoside antibiotics (Kanamycin, Gentamycin, neomycin), Tetracyclines, chloramphenicol, macrolide antibiotics (erythromycin, oleandomycin, tyrothricin). Surface acting antibiotics (polymyxins, bacitracins), Antifungal antibiotics (griseofulvin, nystatin, amphotericin-B, Flucanazole) and other antibiotics-lincomycin, vancomycin, cephalosporins, colistin, novobiocin. etc.
- (c) Antitubercular, antiviral and antineoplastic drugs.
- (d) Nitrofurans: Nitrofurantoin, nitrofurazone, nitrofurazolidone, etc.
- (e) Antiprotozoan drugs: Drugs acting against coccidia, trypanosomes, babesia, theileria, anaplasma, amoeba and plasmodium.
- (f) Anthelmintics, Drugs acting against nematodes, cestodes and trematodes.
- (g) General Antiseptics and Disinfectants: Halogenated compounds, coal tar derivatives, dyes and sulphur compounds.

General Toxicology: Mechanism of detoxification of poisons, General principles of diagnosis and non-antidotal therapy of poisoning, Principles of antidotal therapy.

Toxicology of inorganic compounds: Arsenic, lead, selenium, molybdenum, fluorine, copper, mercury, nitrate and nitrite and oxalates.

Toxicology of Agro-chemicals: Insecticides (organophosphates), chlorinated hydrocarbons and carbamates), fungicides, herbicides and rodenticides.

Toxicology of Poisonous Plants: Cyanogenetic plants, Plants producing photosensitization, teratogenic effect, anticoagulating action, thiamine deficiency. Mycotoxins (ergot alkaloids, aflatoxins and other mycotoxins). Some other important toxic plants and weeds (Milk weeds, tobacco, castor plant, oleander, nuxvomica, solanum, jimson weed, abrus precatorius etc.)

Toxicology of Industrial contamination, food additives, chemical warfare agents and radioactive substances.

Veterinary Physiology [Code: VPY]

Digestion-Control of motility and secretion of alimentary canal; gastric hormones and reflexes in the control of digestive functions; control of rumen motility; digestion in the ruminant and monogastric animals; absorption from rumen and the digestive tract; avian digestion, physiological basis of gastric disorders.

Blood and circulation -Blood coagulation; haemoglobin and its polymorphism, anaemias, reticuloendothelial system, body defence mechanism and immunogenesis, Electrophysiology of heart, electro-cardiography; principles and interpretation; haemodynamics and concerned

biophysical principles; neural and humoral control of heart and blood vessels; cardiac output and vascular reflexes; autoregulation mechanisms in the heart, lungs, brain, muscle, kidneys and skin, blood-brain barrier, circulatory shock and hypertension.

Respiration-Mechanics of respiration; neural and chemical control of respiration, gaseous transport and exchange; hypoxia, anoxia, hypo-barrism and high altitude living; physiology of work and exercise.

Excretion-Modern concepts of urine formation; control of renal circulation; secretion and absorption in the renal tubules; regulation of acid-base balance by the lungs and the kidneys, hormonal and renal regulation of body fluid and electrolytes balance, renal function in desert animals; physiology of micturation; uraemia and other renal disorders.

Climatology-Physiology of climatic stress: effects of stress on production and reproduction; neural and hormonal regulation of body temperature in homeotherms, mechanism and adaptation; Photoperiodicity and biological rhythm.

Muscle contraction- Muscle types; their intracellular contractile mechanisms, electrophysiology of muscles; neuromuscular junction; excitation-contraction coupling, its biochemical and ionic mechanisms, Myopathies.

Nervous System-Neurons, neurotransmission and neurotransmitters, Electrophysiology of nerves; synapses, neuronal circuit receptors, reflexes; cerebral cortex, control of motor & sensory functions; Physiology of plain sensory pathway, Hypothalamus, control of endocrine and visceral functions, autonomic nervous system; basal ganglia structures; Limbic system animal instincts and neurophysiology of behaviour, control of food intake, Special senses.

Endocrinology-Hormones, hormone receptors, mechanism of hormones action at cellular and subcellular levels; Hypothalamic and feed-back control of hormone secretion. Releasing & inhibiting factors; Pineal gland and its hormones; Hormones of hypophyses and all other endocrine glands; non-conventional hormones; mechanisms of different hormone synthesis; endocrine disorders.

Reproductive Physiology-Hypothalamic and hypophysial control of testicular function, spermatogenesis and androgen secretion; inhibition; control of fertility by epididymis; control of male sexual behaviour, erection, ejaculation, semen production and accessory sex glands, male reproductive disorders.

Control of ovarian function, oestrus, ovulation; C.L. and its role in oestrus cycle and pregnancy; oestrogens, progesterone, relaxin and prostaglandins, etc. effect on female genital tract; hormones on oestrus synchronisation and superovulation; female reproductive disorders.

Mechanism of sperm capacitation, sperm and ovum transport, the female genital tract; fertilization, implantation, maintenance of pregnancy and physiology of placenta; Zygote as an endocrine and immunogenic structure.

Physiology of parturition, adrenal corticoids, PGs and oxytocin.

Lactation-Hormonal control of mammary gland, growth before puberty, during pregnancy and after parturition; hormonal control of milk let-down; control of initiation, maintenance and cessation of lactation; hormone and nutrients in milk production; mammary involution, milk precursors and synthesis of milk constituents.

Artificial Insemination-Collection, preservation, transport of semen, semen dilutors; artificial insemination.

Embryo Transfer-Collection, preservation, transport and transplantation of zygotes, oocyte culture and *in vitro* fertilization.

Veterinary Public Health and Epidemiology (Code: VPE)

Scope of veterinary public health; functions and activities of public health veterinarians, veterinary public health administration; organization, and implementation of veterinary public health services and programmes, veterinary public health agencies and institutions in India and abroad.

Concept and classification of zoonoses; comprehensive description of etiology, host range, epidemiology, diagnosis and management of zoonotic diseases (bacterial, viral, fungal, parasitic, rickettsial & chlamydial), factors influencing spread of zoonoses, role of diseased and reservoir wild animal hosts, role of vectors and natural habitat of agents, animals as agents and vectors of human diseases- Animal agents of diseases (biting animals, venomous animals, poisonous food animals, dangerous marine or aquatic animals); Animals as vectors of infection, ecological aspects of zoonoses- Characteristics of diseases-sporadic, endemic (enzootic), epidemic (epizootic), pandemic (penzootic), in apparent, sub-clinical or latent; Carriers; Communicable or transmissible disease; Contagious diseases; Biome; Biotype; Niche; Biotic community; Ecosystem; Parasite host relations, Natural focality of disease, Control of zoonoses- Control of vector population; Reduction of susceptible animal or bird population; Maintenance of ZFD (Zoonoses and food borne diseases) free status; Quarantine etc.

Food hygiene (egg, meat, milk and vegetable and their products); concept of food hygiene, impact of environmental sanitation and other factors on food quality, food spoilage, safety and preservation methods. Packaging - Principles and methods of packaging, Materials used for packaging and their properties, Product and package compatibility, Microbiological aspects of packaging materials. Microbiological standards and quality control (biological and other indicators of hygienic quality and spoilage) of foods to prevent food-borne infections. General principles of prevention of food-borne illnesses, GMP, HACCP, risk analysis. Food plant design, material and sanitation for hygienic standards-Plant design and materials (Site, Floors and drains, Walls, Ceilings and overhead fittings, Equipments, Ventilation, Lighting); Hygienic standards- Water potability; Cleaning and disinfection methods-Definitions (sterilization, sterilant, disinfectant, bactericides, germicide, antiseptic, bacteriostatic, sanitizer, sanitation, soil, cleaning); Detergents and chemical disinfectants- classification and factors affecting their efficacy, use of heat, hot water and steam; Automatic cleaning systems- cleaning in place central cleaning, the self contained system and; gel-foam-and enzyme-based foam system

Abattoir hygiene, hygienic practices in transportation of food animals and their housing; Abattoir-construction designs and layout. Sanitation in the abattoir 'Abattoir effluent treatment, Ante-mortem inspection; Humane slaughter-methods and sanitary, carcass dressing procedures for various species;- Causality and emergency slaughter;' Post-mortem inspection of carcasses-common conditions and diseases encountered, judgment; Adulteration of meat-significance and methods of detection, Aids to meat inspection- Staining, tests for use on meat; prevention of meat contamination after slaughter; treatment and disposal of by-products.

Epidemiology definitions, scope, concepts, types, application and common terms used in epidemiology. Host-Agent-Environmental factors in causation of diseases, disease patterns, routes and means of transmission of diseases, their interruption. Epidemiological data and its presentation. Measures of disease occurrence, their utility and application, analytical epidemiology (analysis of data). Disease monitoring and surveillance, epidemiological studies: experimental and observational, international organizations and laws regulating animal diseases. Analytical methods for disease outbreaks investigation, formulation of causal hypothesis, chronic diseases, production diseases and economic (cost benefit) analysis of disease control and prevention. Theories of disease causation and advancement in the concepts of disease causation,

Iceberg concept. Koch's postulates versus Evan's postulates of disease causation. Epidemiological triangles, disease causal wheels, webs and pies. Endemic stability and Herd immunity, basic reproductive ratio, trends and spatial distribution of diseases, epidemic curves and their utility.

Designing secondary data analysis studies, Epidemiologic study designs, Confounding, selection bias, and causal diagrams. National animal health data, Understanding data, recoding variables, conceptual model, generalized linear models: normal, logistic, and Poisson regression, Time-to-event data models in epidemiology. Survival models, Impact of confounders, Measurement error and misclassification. Sensitivity and specificity analyses of diagnostic tests, Efficacy measures of drug and vaccines.

Veterinary Surgery & Radiology [Code: VSR]

Current concepts in all species of domestic livestock and poultry of inflammation, asepsis, antisepsis, in surgery and surgical bacteriology, sterilization, preoperative considerations, physiopathology of trauma, surgical stress and shock; blood and fluid therapy; post-operative care; phenomenon of wound healing; principles of tissue and organ transplantation.

Study of fracture dislocations, diseases of the bones, their symptoms, diagnosis and treatment, healing of fracture and factors influencing them, complication and their surgical treatments, repair of fractures of different bones of the body by internal and external fixation; various affections of the joints, their diagnosis and treatment.

Surgical management of affections of sinuses, nasal and boucle cavities, pharynx, larynx, trachea and oesophagus in domestic animals. Affections of eye lids, lacrimal apparatus, orbit and its contents, cornea, conjunctiva, iris and lens and ocular therapeutics.

Surgical interventions in various affections of thoracic cavity *viz.* lung, pleura, mediastinal lymph glands and oesophagus. Various approaches for manipulating thoracic organs in large and small animals.

Disease of vascular system *viz.* aneurysm, avascular, necrosis, heart block and coronary occlusion, pericarditis, endocarditis patent ductus arteriosus, persistent foramen ovale, mitral and tricuspid stenosis and insufficiency; persistent aortic arch, and open heart surgery.

Diagnosis and correction of various surgical affections of abdominal organs; traumatic reticulitis, abomasal displacement, impaction of omasum, intestinal obstruction, hernias and neoplasms; surgical treatment of cardiac and pyloric stenosis, gastric torsion, renal and urethral and rupture of urinary bladder in animals.

Relationship between conformation of the limbs, foot and its axis, lameness and allied surgical conditions of fore and hind limbs. Surgical anatomy of udder and teats of domestic animals in relation to different surgical affections.

Selection of various anesthetic and preanaesthetic agents; their effects on different systems of the body, administration of anesthesia in small and large animals; study of the various parameters used in the evaluation of patient during anaesthesia accidents, complication and their remedies; non barbiturate intravenous anesthetics; anaesthesia for special surgical procedures on gut, adrenals and heart, electronarcosis; and hypothermia.

Instrumentation, X-ray machine, formulation of radiographic technique chart; artifacts and their prevention; special diagnostic radiographic densities in relation to clinical diagnosis; deep X-ray unit, isotopic unit for radiation therapy, quality of radiation hazards on man, animals and plants and radiation protection; Cytological changes due to radiation (alpha- X-ray and gamma rays) *in vivo* cellular response following therapy, radiation as an immunosuppressive agent.

LIST OF FACULTY MEMBERS (PhD/MVSc)

Sl. No.	Name of Scientist	Qualification	Designation	Date of Induction
1. ANIMAL BIOCHEMISTRY				
1.	Kataria, M. (Mrs.)	MSc, PhD	HD	22.08.1988
2.	Joshi, P.	MSc, PhD	PS	22.08.1988
3.	Saini, Mohini (Mrs.)	MSc, PhD	PS	05.04.1997
4.	Bhure, Sanjeev Kumar	MVSc, PhD	PS	22.06.2009
5.	Singh Praveen	MSc, PhD	PS	02.06.2010
6.	Mahawar Manish	MVSc, PhD	SS	07.10.2011
7.	Kumar, Ajay	MVSc, PhD	Scientist (SS)	16.07.2014
Member posted at other Division/Section/Station				
8.	Reddy, G.R. (Bengaluru)	MSc, PhD	PS	25.02.1994
9.	Gorakh Mal (Palampur)	MSc, PhD	PS	10.04.2012
10.	Umapathi V. (Bengaluru)	MVSc, PhD	SS	26.02.2013
2. ANIMAL BIOTECHNOLOGY				
1.	Goswami, P.P.	MSc, PhD	HD	20.10.1990
2.	Gupta, Praveen Kr.	MVSc, PhD	PS	29.12.1999
3.	Dey, Sohni (Mrs.)	MVSc, PhD	PS	29.07.2006
4.	C. Madhan Mohan	MVSc, PhD	PS	29.07.2006
5.	Kumar G.VP.P.S	MVSc, PhD	PS	02.06.2010
6.	Dhara, Sujoy Kumar	MSc, PhD	PS	07.10.2011
7.	Shrivastava Sameer	MVSc, PhD	Scientist (SS)	07.10.2011
8.	Sonal (Mrs.)	MVSc, PhD	Scientist (SS)	07.10.2011
9.	Kumar, Deepak	MVSc, PhD	Scientist (SS)	16.07.2014

Creamy Layer Definition

OBC Creamy layer is defined comprehensively at <http://ncbc.nic.in/html/creamyayer.html>

All candidates for the OBC reserved seats should make sure that they do not satisfy any of the creamy layer criteria as listed in the website. Some general exclusion for quick reference (no way comprehensive) are as follows:

1. Any of the parents holds a constitutional position in Govt. of India.
2. Any of the parents is a class I officer.
3. Both the parents are class II officers.
4. Any one of the parents is employed in an equivalent to class I officer or both parents equivalent to class II officer in public sector, insurance companies, banks, universities or in other Organizations
5. Land holdings on irrigated is 85% or more of the statutory ceiling area.
6. Parents' income is more than Rs. 4.5 lakhs per year or Government of India directives applicable at the time of counselling.

AFFIDAVIT BY THE STUDENTS

I,
Son/D/o Mr./ Mrs., having
being admitted to (Name of the Institute),
have received a copy of UGC regulations on curbing the menace of ragging in higher educational
Institution 2009, (hereinafter called "Regulations") carefully read and fully understood the
provisions contained in the said regulations

- 2. I have, in particular, perused clause 3 of the Regulations and am aware as to what constitutes ragging.
- 3. I have also, in particular, perused clause 7 and clause 9.1 of the Regulations and am fully aware of the penal and administrative action that is liable to be taken against me in case I am found guilty of or abetting ragging, actively or passively, or being part of a conspiracy to promote ragging.
- 4. I hereby solemnly aver and undertake that
 - a) I will not indulge in any behaviour or act that may be constituted as ragging under clause 3 of the Regulations.
 - b) I will not participate in or abet or propagate through any act of commission or omission that may be constituted as ragging under clause 3 of the Regulations.
- 5. I hereby affirm that, if found guilty of ragging, I am liable for punishment according to clause 9.1 of the Regulations, without prejudice to any other criminal action that may be taken against me under any penal law or any law for the time being in force.
- 6. I hereby declare that I have not been expelled or debarred from admission in any institution in the country on account of being found guilty of, abetting or being part of a conspiracy to promote, ragging; and further affirm that, in case the declaration is found to be untrue, I am aware that my admission is liable to be cancelled.
