

IVRI-IRRI organized two-day consultation workshop on "Bundling Socio-technical Innovations to Empower Women as Partners and Drivers of Climate Change Solutions."

The Indian Veterinary Research Institute (IVRI), in partnership with the International Rice Research Institute (IRRI), organized a two-day consultation workshop on "Bundling Socio-technical Innovations to Empower Women as Partners and Drivers of Climate Change Solutions." The event took place on 18th and 19th July, bringing together representatives from various ICAR institutes, State Agricultural Universities (SAUs), NGOs, the private sector, and farmers to collectively address the pressing issue of climate change through the empowerment of women.

The workshop served as a platform for experts, stakeholders, and practitioners to share their experiences and insights on incorporating socio-technical innovations that involve and empower women in combating the challenges posed by climate change.

The workshop concluded with a commitment to further strengthen collaboration among various stakeholders to advance socio-technical innovations that empower women as instrumental partners and drivers of climate change solutions.
