Global Recognition for Excellence in Veterinary Science

The ICAR-Indian Veterinary Research Institute, Izatnagar, securing a place in the QS World University Rankings (Veterinary Science) marks a proud and historic milestone for India's veterinary science and research community. This global recognition reflects the institute's long-standing excellence in veterinary education, advanced research, technology development, and its vital national service in animal health and livestock development.

The institute has also consistently earned national recognition, securing top positions in the National Institutional Ranking Framework (NIRF), underscoring its academic quality, research output, and institutional excellence. Established in 1889, IVRI has a glorious legacy spanning more than a century (136 Years). Over time, it has evolved into India's premier veterinary research institution and a Deemed University.

IVRI has produced generations of eminent veterinarians and scientists who have made significant contributions to animal health, food security, and public health in India and abroad. The institute has played a pioneering role in the diagnosis, prevention, and control of major livestock diseases and has developed important vaccines, diagnostic techniques, and disease management strategies for several economically important animal diseases.

Notably, IVRI made significant contributions to national efforts that led to the eradication of Rinderpest, one of the most devastating cattle diseases in history, marking a landmark achievement in veterinary science and disease control. These contributions have substantially strengthened India's livestock sector and rural economy.

Beyond research, IVRI has made remarkable contributions to human resource development through postgraduate and doctoral education, professional training, and national capacity-building programs. Its academic excellence is further reflected in its accreditation with an A++ grade by the National Assessment and Accreditation Council, the highest grade awarded by NAAC.

The inclusion of IVRI in the QS World University Rankings thus recognizes its scientific excellence, academic leadership, and national contributions, symbolizing India's growing global presence in veterinary education, research, and innovation. IVRI continues to stand as a symbol of excellence, contributing significantly to animal health, public health, and national development. The inclusion of ICAR-Indian Veterinary Research Institute in the QS World University Rankings (Veterinary Science) is a landmark achievement for India's veterinary education and research system.

It signifies global recognition of IVRI's excellence in:

- Advanced veterinary research and innovation
- Quality postgraduate and doctoral education
- Development of vaccines and diagnostic technologies
- Contributions to national livestock health and disease control

This recognition places IVRI among leading international institutions in veterinary science and highlights India's growing presence in global scientific and academic platforms. It also reflects the institute's strong research output, academic reputation, and international visibility.
